This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

MESSAGE OF THE PRESIDENT.

To the Senate and House of Representatives:

I transmit herewith the Seventh Special Report of the Commissioner of Labor. This report relates to what is generally known as the slums of cities, and has been prepared in accordance with a joint resolution, approved July 20, 1892.

GROVER CLEVELAND.

EXECUTIVE MANSION,
Washington, D. C., July 27, 1894.

LETTER OF TRANSMITTAL.

DEPARTMENT OF LABOR,
Washington, D. C., July 25, 1894.

SIR: I have the honor to hand you herewith a special report relating to the slums of New York, Philadelphia, Baltimore, and Chicago, being a report prepared in accordance with a joint resolution of Congress providing for an investigation relative to the slums of cities, approved July 20, 1892.

The facts for this report, under the joint resolution referred to, were chiefly gathered by a force of temporary experts, under the general superintendence of Mr. Victor H. Olmsted, one of the statistical experts of this Department. The chemical and microscopic investigation relating to the condition of air in tenement houses in New York and Philadelphia was made by Alfred S. Houghton, M. D. The tabulations have been in charge of Mr. G. W. W. Hanger, one of the statistical experts of the Department, to whom also was committed the chief labor of preparing the tables and their analyses. The superintendents of police and their assistants and the patrolmen and the health officers of the cities canvassed have given the Department every assistance in their power for the prosecution of the investigation. I desire to thank these gentlemen most cordially for their valuable services, and my thanks are also due to Mr. Oren W. Weaver, the chief clerk of the Department, for his advice and suggestions, and to Mr. Henry W. Spofford for his careful preliminary study of the cities.

I am, very respectfully, your obedient servant,

CARROLL D. WRIGHT,
Commissioner.

The PRESIDENT.

INTRODUCTION.

INTRODUCTION.

The Congress of the United States, responding to various requests upon it, authorized an investigation relative to the slums of cities containing 200,000 inhabitants and over, as shown by the eleventh census. The law under which the investigation was undertaken is as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Commissioner of Labor be, and he is hereby, authorized and directed to make a full investigation relative to what is known as the slums of cities, confining such investigation to cities containing two hundred thousand inhabitants and over, as shown by the eleventh census. The investigation shall relate to the occupations, earnings, sanitary surroundings, and other essential facts necessary to show the condition of residents of such localities, and to show so far as it may be done the condition of such residents compared with residents of cities of similar size in other countries. The sum of twenty thousand dollars, or so much thereof as may be necessary to defray the expenses of said investigation, said sum being in addition to the regular appropriations for the Department of Labor, is hereby appropriated out of any money in the Treasury not otherwise appropriated.

Approved, July 20, 1892.

The cities comprehended in this resolution are Baltimore, Boston, Brooklyn, Buffalo, Chicago, Cincinnati, Cleveland, Detroit, Milwaukee, New Orleans, New York, Philadelphia, Pittsburg, Saint Louis, San Francisco, and Washington, sixteen in all, with a total population of 8,037,458. Before entering upon the investigation an estimate was made of the total population of the slum districts of the cities named, and it was found that according to the best information obtainable from the municipal authorities of the different cities the slum districts in the sixteen cities named comprehended at the least calculation about 800,000 people. The work which the Department of Labor had in hand prevented entering at once upon the investigation called for by the joint resolution referred to, but preliminary studies were made of the cities, resulting in the conclusion that the sum of $20,000 appropriated by the resolution of July 20, 1892, was altogether inadequate for the collection of the facts called for. An estimate for additional appropriation was therefore made, but Congress took the ground that it was better to make a tentative investigation in accordance with the resolution, even if only for certain districts of certain cities comprehended by the resolution. This was probably a wise conclusion. The results of

the present investigation, therefore, relate only to the cities of Baltimore, Chicago, New York, and Philadelphia, and to certain districts within those cities concerning which there can be no difference of opinion as to whether or not they are slum districts. The districts are clearly defined in the analysis of the tables, and their boundaries need not be repeated here. The population of the districts canvassed, as shown by the eleventh census, June 1, 1890, and by the canvass of this Department, which represented the conditions April 1, 1893, is as follows:

POPULATION OF THE SLUM DISTRICTS CANVASSED.

City.	June 1, 1890 (eleventh census).	April 1, 1893.
Baltimore	16,878	18,048
Chicago	17,637	19,748
New York	27,462	28,996
Philadelphia	15,409	17,060
Total	77,386	83,852

The total population canvassed in the four cities is 83,852.

The districts selected by no means contain the whole slum population of the cities included in the investigation. According to the best estimates, the total slum population of Baltimore is about 25,000; of Chicago, 162,000; of New York, 360,000; of Philadelphia, 35,000. The districts selected are among the worst in the cities, and may be denominated as the centres of the slum population. They were outlined and selected in consultation with the city authorities.

The investigation has been conducted relative to this number of people in the four cities named for the sum appropriated in the resolution. The investigation, however, was, as intimated, a tentative one. To carry it out to include the sixteen cities comprehended in the resolution, with an estimated slum population of 800,000, would probably cost from $125,000 to $150,000. Should Congress feel, therefore, that the investigation should be extended to cover the whole sixteen cities, and even more, an appropriation sufficient for the work of such investigation should be made. It is somewhat doubtful, however, whether the results would be commensurate with the expense—that is to say, it may be that the results of the present investigation are sufficiently indicative of all the conditions without any further study.

Of course in an investigation like the one under discussion inquiries must be made of such a character as to result in positive information. Those looking to theoretical conditions or psychological elements must be avoided to a certain extent, for two reasons: Because they will not result in any satisfactory information, and because to carry them out is altogether too expensive; as, for instance, inquiries looking to the causes why people are found in the slum districts of cities, what brought them there, the experience in life which leads to such a residence, and all such questions are too vague for the application of the

statistical method, and although a great number of opinions and varied views might be obtained, the result would be far from satisfactory and would not compensate for the expense involved. To secure satisfactory results of a scientific nature along such lines would involve the application of a detective method which should reach each resident of the slums.

Should an investigation be ordered covering all the large cities of the country, the experience of the present investigation would indicate that a line of inquiries should be adopted which would not only be the least expensive but the most far-reaching, and it might be possible, under present experience, to so shape a schedule of inquiries as to bring out, on the whole, more valuable information than that secured under the present investigation; but in shaping any further investigation there must be borne in mind, what was borne in mind in the present inquiry, the temper of the people. Those who live in the slums of cities are as sensitive and as antagonistic under governmental inquiry as those of other localities, and they resent a question which, in their minds, is too searching in its nature. The limitations of an investigation, therefore, have to be carefully studied before the work is projected, and much of the criticism which might be made of the present investigation will fail of application when the limitations and difficulties of securing information from the people are thoroughly considered. The inquiries adopted in the present investigation were considered as searching as it was wise to undertake with any prospect of success, and yet there are many questions which it would have been desirable to have incorporated in the schedules.

The first question which confronted the Department relative to the subject was, what are the "slums" of cities, their boundaries, their constituent elements, and how far can certain districts be considered as coming within the definition? The slums of cities, according to the dictionaries, are dirty back streets, especially such streets as are inhabited by a squalid and criminal population; they are low and dangerous neighborhoods. It was necessary, therefore, in selecting the districts of the four cities considered, to be sure that localities coming within this definition only were comprehended. It should be borne in mind that in each city all the inhabitants of the districts selected have been brought under the investigation. In every district there are to be found people of the highest respectability, people of means, living in good houses, etc. They have all been considered as inhabitants of the slum districts, and necessarily so, because the enumerators or agents engaged in collecting the facts could not be expected in each case to draw the line. The results, however, of such comprehensive inquiry are shown in the classification of occupations, earnings, etc.

The cities themselves were selected because they represent great types—New York one type of a great metropolitan seaport city, under the influence of commercial conditions, while Philadelphia offered other

conditions, typical in themselves. It may be considered a border city to a certain extent, as between the business interests of the North and the South, and yet it has, to a degree, the elements essential to the definition of slums. Its shipping and its railroads furnish means of easy access, while it is a great manufacturing centre. Baltimore, the most typical business southern city in the Union, has all the elements of a great metropolis, and yet differently situated from either New York or Philadelphia, while Chicago, as a great inland city, with all its varied interests of transportation, manufacturing, and general commerce, and the varied nationality of its population, was naturally selected.

The investigation was carried on uniformly in the four cities, and all the facts collected have been classified in tabular form and the salient points and results clearly brought out in the text analysis preceding the tables; yet it may be well, in this introduction, to still further crystallize the general results of the investigation, especially in order to show just what is to be learned from it. Of course, if the conditions in the slum districts are the same as in the cities at large in which they are situated, nothing is to be gained from an investigation of this character; so the crucial elements of the investigation are to be found by bringing its results relative to the districts selected into comparison with the conditions in the cities at large at the eleventh census.

GENERAL RESULTS OF THE INVESTIGATION.

While the general results of the investigation into the slums of cities are clearly brought out in the text analysis of the various tables, there are a few general results which may with profit be culled from the analysis and set forth in the present place.

LIQUOR SALOONS.—In the city of New York there was, at the time of the investigation, 1 liquor saloon to every 200 persons, but in the slum district canvassed there was 1 saloon to every 129 persons. In Philadelphia, in the city at large, there was 1 liquor saloon to every 870 persons, but in the slum district canvassed there was 1 such saloon to every 502 persons. In Baltimore, in the city at large, there was 1 saloon to every 229 persons, but in the slum district canvassed there was 1 saloon to every 105 persons. In Chicago, in the city at large, there was 1 saloon to every 212 persons, while in the slum district canvassed there was 1 saloon to every 127 persons. (*a*)

ARRESTS.—No general tables regarding arrests are presented in this report, as the Department made no original inquiries relating to the subject. From the police records of the different cities the facts

a For the number of saloons in the cities at large dependence has been placed upon a Report on Social Statistics of Cities, as shown at the eleventh census, by Dr. John S. Billings, U. S. Army. The facts given in Dr. Billings' report show that at the eleventh census Baltimore had 1,900 saloons; Chicago, 5,200; New York, 7,579; and Philadelphia, 1,203.

in regard to the number of arrests made during the year 1893 were obtained. It was not possible to ascertain from these records the number of arrests chargeable to the slum districts exactly as marked out for the rest of the investigation. A statement was obtained, however, for the police districts or precincts in which the above slum areas were located. With these facts it is possible to make comparisons between the arrests made in the cities at large and in the police districts containing the slums canvassed. The following brief tables present these arrests classified by the offences for which made and the sex, and show also the ratio of arrests to population.

ARRESTS IN THE WHOLE CITY AND IN THE EASTERN POLICE DISTRICT OF BALTIMORE, IN 1893, BY SEX AND OFFENCES.

[A very small section of the slum area of Baltimore covered by this investigation is not included in the eastern police district, but as the population is very small, and as arrests there are said by the police to be comparatively rare, the central police district, in which it is located, is not included here. It must be noted in considering the proportional statements that the population figures are for 1890 and the arrests for 1893.]

Offences.	The city (population 1890, 434,439).				Eastern police district (population 1890, 51,767).			
	Male.	Female.	Total.	Ratio of arrests to population.	Male.	Female	Total.	Ratio of arrests to population.
Assault and battery (a)	(b)	(b)	4,083	1 to 106	589	86	675	1 to 77

Robbery	220	12	232	1 to 6,531	28	.....	28	1 to 1,862
Vagrancy (*d*)	1,799	862	2,661	1 to 569	96	68	164	1 to 318
All other offences	21,097	1,172	22,269	1 to 68	1,874	206	2,080	1 to 25
Total	67,768	18,720	86,488	1 to 18	*e*6,220	*e*2,493	*e*8,713	*e*1 to 6

a Including felonious assault, indecent assault, assault with intent to steal, assault on an officer, and assault and battery.
b Including keeping gambling house.
c Including grand larceny, petty larceny, and larceny from the person.
d Including begging.
e Including arrests of 337 males and 63 females, a total of 400, estimated. There were 8,005 arrests (of which 6,747 were of males and 1,258 of females) made by officers of the detective bureau, special service squad, sanitary squad, central office squad, and court squads, the reports of which do not indicate the particular precincts in which they were made. These arrests are included in the figures for the entire city. Mr. William Delamater, the first deputy clerk and statistician of the police department, estimates that 5 per cent of these arrests were made in the sixth and tenth precincts. Accordingly 5 per cent of these 8,005 arrests (6,747 males and 1,258 females) have been included in the total, but not in the arrests for each offence.

ARRESTS IN THE WHOLE CITY AND IN THE SECOND POLICE DISTRICT OF PHILADELPHIA IN 1893, BY SEX AND OFFENCES.

[It must be noted in considering the proportional statements that the population figures are for 1890 and the arrests for 1893.]

Offences.	The city (population 1890, 1,046,964).				Second police district (population 1890, 71,872).			
	Male.	Female.	Total.	Ratio of arrests to population.	Male.	Female.	Total.	Ratio of arrests to population.

a Including aggravated assault and battery, assault with intent to kill, and assault on an officer.
b Not reported.
c Including attempt to commit burglary.
d Including keeping gambling house.
e Including street walking.
f Although intoxication and disorderly conduct is one of the recognized offences in other police districts, the records of the second district do not show it as a cause of arrest. The officer in charge of the district stated that within his jurisdiction, if arrested intoxicated persons were very disorderly, the charge entered againt them was breach of peace, otherwise they were charged with simple intoxication.
g Including keeping disorderly house.
h Including suspicion of larceny and picking pockets.
i Including murder.

In the year 1893 (that in which the investigation under consideration was made) there was in the whole city of Baltimore 1 arrest to every 14 persons, while in the eastern police district, with a population of 51,767 at the United States census of 1890, there was 1 arrest to every 9 persons. In Chicago, in the city at large, there was 1 arrest to every 11 persons, while in the second and twenty-first police precincts, with a population of 117,503 at the United States census of 1890, there was 1 to every 4 persons. In New York, in the city at large, there was 1 arrest to every 18 persons, while in the sixth and tenth police precincts, with a population of 52,130 at the United States census of 1890, there was 1 to every 6 persons. In Philadelphia, in the city at large, there was 1 arrest to every 18 persons, while in the second police district, with a population of 71,872 at the United States census of 1890, there was 1 to every 13 persons. Comparisons may be made in like manner of the ratio of arrests to population in the several cities, and in the police districts for each particular offence.

SEX.—Comparing the sex of the population in the slum districts canvassed with that of the whole city, it is found that in each case the per cent of males is greater in the slum districts. In Baltimore, in the city at large, 47.44 per cent of the population are males, while in the slum district selected the males constitute 49.84 per cent

of the population. In Chicago the difference is between 51.68 per cent for the whole city and 53.93 per cent for the slum district. In New York the difference is between 49.34 per cent for the whole city and 54.61 per cent for the slums. In Philadelphia, it is between 48.82 per cent for the city at large and 53.48 per cent for the slum districts.

NATIVE AND FOREIGN BORN.—The total foreign born in the city of Baltimore is 15.88 per cent of the total population, but in the slum district canvassed it is 40.21 per cent; in Chicago the total foreign born in the city at large constitutes 40.98 per cent of the population, while in the slum district it is 57.51 per cent; in New York the foreign born is 42.23 per cent of the total population, while in the slum districts it is 62.58 per cent; and in Philadelphia the foreign born constitutes 25.74 per cent of the total population and 60.45 per cent of the slum population. These figures show conclusively that the proportion of foreign born persons in the slums of each city is very largely in excess of the proportion for the whole population. This excess is in Baltimore 24.33 per cent; in Chicago, 16.53 per cent; in New York, 20.35 per cent, and in Philadelphia, 34.71 per cent. The proportions as to nationality are brought out as to each of the cities investigated in the tables and the text analysis preceding them, and particular attention is called thereto. The facts take up too much space to allow them to be brought forward at this point.

ILLITERACY.—In the whole city of Baltimore the illiterates constitute 9.17 per cent of the native born population and 12.40 per cent of the foreign born, the percentage for both being 9.79. In the slum district of that city 8.13 per cent of the native born and 30.62 per cent of the foreign born are illiterate, while the percentage for both is 19.60. In the city of Chicago at large the illiterates constitute 0.81 per cent of the native born population and 8.31 per cent of the foreign born, the percentage for both being 4.63; but in the slum district canvassed 5.64 per cent of the native born persons are illiterate and 33.86 per cent of the foreign born, the percentage for both being 25.37. In New York the percentage of illiterates is 1.16 of the entire native born population and 14.06 of the foreign born, the percentage for both being 7.69, while for the slum population the percentage of native born who are illiterate is 7.20 and of the foreign born 57.69, the percentage for both being 46.65. Philadelphia shows nearly as large a proportion of illiterates in the slum districts as New York, the figures for the whole population showing that 2.18 per cent of all native born persons are illiterate and 11.29 per cent of foreign born, the united percentage being 4.97. In the slum districts of Philadelphia, however, 8.44 per cent of the native born persons and 46.61 per cent of the foreign born are illiterate, the percentage for the two classes being 37.07. The tables and analyses accompanying them show distinctions as to illiteracy by sex, nativity, age periods, etc.

VOTERS.—In the city of Baltimore 20.13 per cent of all the voters of the city are foreign born, but in the slum district canvassed 44.04

per cent of the voters are foreign born. The variation in Chicago is not so great, the foreign born voters of the whole city being 50.62 per cent, and in the slum district canvassed 61.31 per cent. Of the whole number of voters in New York city 49.93 per cent are foreign born, while in the slum districts canvassed 62.44 per cent are foreign born. In Philadelphia the differences are greater, 29.52 per cent of the total voters being foreign born, and 58.94 per cent of the voters in the slum districts belonging to that class.

OCCUPATIONS.—The occupations of the residents of the slum districts in the four cities named are as varied, probably, as in the cities at large, but direct comparisons with the occupations of the whole city in each case can not be made, as the classification of occupations as shown by the eleventh census is not yet ready for use.

EARNINGS.—The earnings of the people living in the slum districts canvassed are quite up to the average earnings of the people generally and at large, but as there are no data with which to make comparisons of average earnings, the results of this investigation must practically stand alone; yet, from all that can be learned from various sources, the statement made is believed to be correct.

HEALTH.—The agents and experts employed in this investigation were nearly unanimous in the opinions they expressed relative to the health of the people of the slum districts. It should be remembered that this investigation was conducted in the most thorough census manner, each and every house and every tenement in every house being visited and the facts taken down for each and every individual living in the slum districts. The testimony of the agents, therefore, relative to general conditions is most valuable. The statistics drawn from the schedule replies show no greater sickness prevailing in the districts canvassed than in other parts of the cities involved, and while the most wretched conditions were found here and there, the small number of sick people discovered was a surprise to the canvassers. It may be that owing to the time of year (late spring) the people were living with open windows, and thus not subjected to the foul air which might be found in the winter. The report of Dr. Houghton, however, already referred to, the results of which are shown at the end of the chapter on analyses of the tables, will throw much light upon this question.

PERSONS TO EACH DWELLING.—According to the eleventh census, the number of persons to a dwelling in Baltimore was 6.02; in Chicago, 8.60; in New York, 18.52; in Philadelphia, 5.60. The averages for the slum districts are about the same for Baltimore and Philadelphia, there being in the former city 7.71 persons to a dwelling, and in Philadelphia 7.34 persons; but in Chicago the slum population averages 15.51 persons to each dwelling, and in New York 36.79 persons.

These points which have been brought out show the value of the present report, and other features can be studied with nearly, if not quite, as valuable results.

CHAPTER I.

ANALYSIS OF TABLES.

CHAPTER I.

ANALYSIS OF TABLES.

The tables presented in this chapter have been compiled from schedules secured by the agents of the Department in the cities of Baltimore, Chicago, New York, and Philadelphia. For the reasons stated in the introduction no effort was made to secure individual reports for the entire slum population of these cities, but in each, one or more districts were selected which were thought to be representative. These districts were canvassed thoroughly, and the facts for every individual living in them on April 1, 1893, are included in the tables which constitute Chapter II. Of course there were families of respectability and some even of wealth living in these districts, and these are necessarily included, as has already been noted. In some cases streets or portions of streets now forming a part of one of these slum districts were once wholly inhabited by the wealthy and aristocratic, and it is not strange that here and there are instances of families of this class still maintaining the ancient family home in the midst of the slum population which has overrun and dispossessed their former well to do and respectable neighbors.

The districts selected in the cities named are bounded as follows:

Baltimore.—Starting from the harbor, along Chester street to Canton avenue, along Canton avenue to Broadway, along Broadway to Bank, along Bank to Bond, along Bond to Pratt, along Pratt to Albemarle, along Albemarle to Stiles, along Stiles to East Falls avenue, along East Falls avenue to city dock, along city dock to Lancaster street, along Lancaster to Bond, and along Bond to the harbor.

Chicago.—Starting from Polk and Halsted streets, along Halsted to Taylor, along Taylor to Newberry avenue, along Newberry avenue to Twelfth, along Twelfth to State, along State to Polk, and along Polk to Halsted.

New York.—(1) Starting from the corner of Centre and Worth, along Centre to Leonard, along Leonard to Baxter, along Baxter to Canal, along Canal to Centre, along Centre to Hester, along Hester to Mulberry, along Mulberry to Spring, along Spring to Elizabeth, along Elizabeth to Canal, along Canal to Bowery, along Bowery to Worth, and along Worth to Centre.

(2) Starting from the corner of Broome and Broadway, along Broadway to East Houston, along East Houston to Elizabeth, along

Elizabeth to Prince, along Prince to Marion, along Marion to Spring, along Spring to Crosby, along Crosby to Broome, and along Broome to Broadway.

Philadelphia.—(1) Starting from the corner of Front and South streets, along South to Fourth, along Fourth to Bainbridge, along Bainbridge to Front, and along Front to South.

(2) Starting from the corner of South and Fifth streets, along South to Ronaldson, along Ronaldson to Bainbridge, along Bainbridge to Eighth, along Eighth to Fitzwater, along Fitzwater to Fallon, along Fallon to Christian, along Christian to Eighth, along Eighth to Marriott, along Marriott to Fifth, along Fifth to German, along German to Passayunk avenue, along Passayunk avenue to Bainbridge, along Bainbridge to Fifth, and along Fifth to South.

The entire number of persons reported as living in these districts on April 1, 1893, was as follows: Baltimore, 18,048; Chicago, 19,748; New York, 28,996; Philadelphia, 17,060. A comparative statement showing the population of these districts in the four cities as reported at the eleventh census of the United States (June 1, 1890) and at the date of the canvass by the Department (April 1, 1893) immediately follows:

POPULATION OF THE SLUM DISTRICTS CANVASSED.

City.	June 1, 1890 (eleventh census).	April 1, 1893.
Baltimore	16,878	18,048
Chicago	17,637	19,748
New York	27,462	28,996
Philadelphia	15,409	17,060
Total	77,386	83,852

The tables relating to the condition of the inhabitants of the districts canvassed in the cities of Baltimore, Chicago, New York, and Philadelphia, and which form the basis of the following analyses, are numbered from I to XXXIII, inclusive. In each table are given separately the results for each of the four cities, Baltimore, Chicago, New York, and Philadelphia, in the order named. It was thought best to arrange the results in this manner in order that the cities might be more readily compared by the reader in regard to similar facts. The titles of the general tables contained in Chapter II of this report, designating the facts contained in each, are as follows:

TABLE I.—Color or race, by sex, nativity, conjugal condition, and age periods.
TABLE II.—Selected places of birth, by age periods and sex.
TABLE III.—Number and size of families, by kind of family.
TABLE IV.—Nativity of parents.
TABLE V.—Relationship to head of family, by nativity and sex.
TABLE VI.—Voters and aliens.
TABLE VII.—Foreign born voters and aliens, by selected places of birth.
TABLE VIII.—Aliens, by selected places of birth and age periods.
TABLE IX.—Aliens, by occupations and selected places of birth.

TABLE X.—Years in the United States of foreign born males 21 years of age or over, by selected places of birth.

TABLE XI.—Years in the United States of aliens, by selected places of birth.

TABLE XII.—Years in the United States of foreign born males 21 years of age or over, by voters and aliens.

TABLE XIII.—Illiterate aliens, by degree of illiteracy, selected places of birth, and age periods.

TABLE XIV.—Illiterate aliens and total aliens compared, by selected places of birth.

TABLE XV.—Illiterate aliens and illiterate foreign born males 21 years of age or over, by selected places of birth.

TABLE XVI.—Occupations, by sex and selected places of birth.

TABLE XVII.—Weekly earnings and days and hours of labor, by occupation and sex.

TABLE XVIII.—Classified weekly earnings, by sex and occupation.

TABLE XIX.—Persons unemployed, by months unemployed, sex, and age periods.

TABLE XX.—Illiterates, by degree of illiteracy, selected places of birth, age periods, and sex.

TABLE XXI.—Illiterates, by nativity, sex, and parent nativity.

TABLE XXII.—Illiterates, by sex, occupation, and age periods.

TABLE XXIII.—Persons illiterate as regards English, but literate as regards some other language, by selected places of birth, age periods, and sex.

TABLE XXIV.—Illiterates and literates, by selected places of birth and sex.

TABLE XXV.—School attendance, by nativity, age, kind of school, and sex.

TABLE XXVI.—Condition of all children from 5 to 14 years of age, inclusive, by nativity, sex, and nativity of parents.

TABLE XXVII.—Married women having a specified number of children living, by number of children born to each, age periods, and nativity.

TABLE XXVIII.—Persons sick or physically defective, by kind of ailment or defect, nativity, and sex.

TABLE XXIX.—Number of families and individuals, by tenements to a house and rooms to a tenement.

TABLE XXX.—Families and individuals living in owned and in rented tenements compared, by tenements to a house and rooms to a tenement.

TABLE XXXI.—Weekly rent paid per tenement, by rooms to the tenement.

TABLE XXXII.—Sanitary condition of tenements.

TABLE XXXIII.—Occupants of sleeping rooms and cubic feet of air space per individual, by number of outside windows and occupants to a room.

In the analysis of the various tables comparison has been made, whenever possible, of the facts relating to the persons residing in the districts canvassed with the facts for the whole population of the city, in order to bring out any abnormal conditions that may exist in the slum districts. The facts for the whole city were taken from the eleventh census of the United States, and were for the year ending May 31, 1890. This investigation covers the year ending March 31, 1893. The difference in the time of the two investigations, however, would not invalidate the comparisons made, inasmuch as the conditions were practically the same at the two dates.

These tables are taken up in the order given above.

Table I.—Color or race, by sex, nativity, conjugal condition, and age periods, pp. 104 to 113.—The first table shows each color or race, subdivided as male and female, as regards nativity and conjugal condition, for the following age periods: Under 5 years, 5 to 9 years, 10 to 14

years, 15 to 19 years, 20 to 24 years, 25 to 29 years, 30 to 34 years, 35 to 39 years, 40 to 44 years, 45 to 49 years, 50 to 54 years, 55 to 59 years, 60 to 64 years, 65 years or over, age not reported, and all ages. The information is presented for the districts canvassed in each of the four cities involved. As regards color, four classes have been used: White; black; mulatto, quadroon, and octoroon; and Chinese. The proportion of persons of these various classes to the whole population of the districts canvassed in each city is as follows:

NUMBER AND PER CENT OF PERSONS OF EACH COLOR OR RACE.

Color or race.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
White	17,299	95.85	18,590	94.14	28,627	98.73	16,612	97.38
Black	597	3.31	696	3.52	98	.34	348	2.04
Mulatto, quadroon, and octoroon.	146	.81	429	2.17	60	.20	84	.49
Chinese	6	.03	33	.17	211	.73	16	.09
Total	18,048	100.00	19,748	100.00	28,996	100.00	17,060	100.00

A somewhat similar table, drawn from the results of the eleventh census of the United States, which takes into consideration the whole population of the four cities, follows.

NUMBER AND PER CENT OF PERSONS OF EACH COLOR OR RACE, FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

Color or race.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
White	367,143	84.51	1,084,998	98.65	1,489,627	98.31	1,006,590	96.14
Black, Mulatto, quadroon, and octoroon.	67,104	15.45	14,271	1.30	23,601	1.56	39,371	3.76
Chinese	178	.04	567	.05	1,970	.13	738	.07
Total	a434,439	100.00	a1,099,850	100.00	a1,515,301	100.00	a1,046,964	100.00

a Including Japanese and civilized Indians.

White persons, as is seen, represent the great mass of the persons residing in the slum districts as well as of the total population. Taking up the two tables so far as they relate to Baltimore, where the greatest differences in percentages occur, it is shown that 95.85 per cent of the residents of the slum districts are white, 4.12 per cent are black, mulatto, quadroon, and octoroon, and but three one-hundredths of one per cent Chinese, no Japanese or civilized Indians having been found in these districts. The figures showing the distribution of the total population of the city of Baltimore as regards color or race, are 84.51 per cent white, 15.45 per cent black, mulatto, quadroon, and octoroon, four one-hundredths of one per cent Chinese, the number of Japanese and civilized Indians being very small, less than one one-hundredth of one per cent. The facts for the other cities may be com-

pared in a similar manner. The conclusions drawn from the comparisons of the slum with the total population are briefly, that in Baltimore the proportion of blacks, mulattoes, etc., in the slum districts canvassed is much less than that found in the whole city, being 4.12 per cent for the slum districts and 15.45 per cent for the whole city; in Chicago the reverse is true, the proportion of blacks, mulattoes, etc., in the slum districts being 5.69 per cent and for the whole city but 1.30 per cent; in New York fifty-four one-hundredths of one per cent of the slum population are blacks, mulattoes, etc., while they compose 1.56 per cent of the total population; and in Philadelphia they constitute 2.53 per cent of the slum and 3.76 per cent of the total population. As regards the Chinese population it is seen that in Chicago, New York, and Philadelphia the proportion is greater for the slum districts than for the whole city. The great excess in the proportion of Chinese in the slum districts of Chicago and New York is probably due to the fact that the districts canvassed in these cities contained colonies of these people, notably Mott street in New York and Clark street in Chicago. No Japanese or civilized Indians were found in the slum districts. The number reported by the eleventh census of the United States for Baltimore, Chicago, and New York was so small as to make no difference in the percentages, while in Philadelphia they constituted but three one-hundredths of one per cent of the total population.

From Table I may also be drawn a statement distinguishing the persons of each color or race in the slum districts as to sex.

NUMBER AND PER CENT OF PERSONS OF EACH SEX, BY COLOR OR RACE.

Color or race.	Male.		Female.		Total.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
BALTIMORE.

PHILADELPHIA.						
White	8,894	53.54	7,718	46.46	16,612	100.00
Black	170	48.85	178	51.15	348	100.00
Mulatto, quadroon, and octoroon	43	51.19	41	48.81	84	100.00
Chinese	16	100.00	.....	.....	16	100.00
Total	9,123	53.48	7,937	46.52	17,060	100.00

In Baltimore, of all persons involved in the investigation, 49.84 per cent were males and 50.16 females. In the other cities the males preponderate slightly. The table also shows the proportion of males and females of each color or race in each of the cities involved.

The entire population of the cities involved in the investigation is subdivided as to sex in the short table below.

NUMBER AND PER CENT OF PERSONS OF EACH SEX FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

City.	Male.		Female.		Total.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Baltimore	206,114	47.44	228,325	52.56	434,439	100.00
Chicago	568,402	51.68	531,448	48.32	1,099,850	100.00
New York	747,579	49.34	767,722	50.66	1,515,301	100.00
Philadelphia	511,122	48.82	535,842	51.18	1,046,964	100.00

Of the whole population of these cities females predominate in Baltimore, New York, and Philadelphia, and males in Chicago.

Comparing the table for the slum districts with that for the whole population of the four cities, it is seen that in every city the proportion of males in the slum districts is in excess of that for the whole city.

The number and percentages of native and foreign born persons of each color or race in the slum districts appear below:

NUMBER AND PER CENT OF NATIVE AND FOREIGN BORN, BY COLOR OR RACE.

Total	6,748	39.55	10,312	60.45	17,060	100.00

The per cent of white persons who are native born, it is seen, ranges from 37.31 to 39.18 for the cities of Chicago, New York, and Philadelphia, while for Baltimore it is much larger, being 58.12 per cent. These per cents correspond practically with the per cents for the whole number reported for each city, because white persons constitute the great majority of the population. Almost all persons classed as black, and as mulatto, quadroon, and octoroon are native born, while those classed as Chinese are all foreign born in Baltimore, Chicago, and Philadelphia, and 91 per cent foreign born in New York.

For the sake of comparison the following table is given, showing the same facts for the entire population of the four cities. As in a previous table the Japanese and civilized Indians, constituting a very small per cent of the whole population, have been omitted from the details, but have been included in the totals for each city, as is shown in the footnote to the table itself. It has been possible in this table to divide the blacks, mulattoes, quadroons, and octoroons into two classes:

NUMBER AND PER CENT OF NATIVE AND FOREIGN BORN, BY COLOR OR RACE, FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

Color or race.	Native born.		Foreign born.		Total.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

a Including Japanese and civilized Indians.

This table shows that the proportion of native and foreign born blacks, mulattoes, quadroons, and octoroons, and Chinese for the whole population of each of the four cities does not differ materially from the proportion for the slum districts canvassed, the great mass of the

blacks, mulattoes, quadroons, and octoroons being of native birth in both tables, while the reverse is true of the Chinese. The proportion of native and foreign born white persons and, consequently, of total native and foreign born, does differ greatly. In Baltimore 81.32 per cent of the whole white population are native born, while in the slum district but 58.12 per cent are of native birth; in Chicago 58.56 per cent of all whites are native born, while but 39.18 per cent of the white residents of the slum district are native born; in New York the per cent of native born white persons is 57.24 for the whole city and 37.31 for the slum districts; while in Philadelphia the per cent is 73.35 for the whole city and but 38.06 for the slum districts. The proportion of native and foreign born of all colors and races, as stated before, does not differ greatly from that of the whites, because of the great preponderance of that color in point of numbers. The following table takes up the facts for the native and foreign born of the whole population and of the slum population of the cities involved.

NATIVITY OF THE SLUM POPULATION AND TOTAL POPULATION COMPARED.

City.	Slum population.		Total population.	
	Native born (per cent).	Foreign born (per cent).	Native born (per cent).	Foreign born (per cent).
Baltimore	59.79	40.21	84.12	15.88
Chicago	42.49	57.51	59.02	40.98
New York	37.42	62.58	57.77	42.23
Philadelphia	39.55	60.45	74.26	25.74

This table shows conclusively that the proportion of foreign born persons in the slums in each city is largely in excess of the proportion for the whole population. The difference in Baltimore is 24.33 per cent; in Chicago, 16.53 per cent; in New York, 20.35 per cent; and in Philadelphia, 34.71 per cent.

The short table below, relating to the conjugal condition of all persons in the districts canvassed, subdividing them as single, married, widowed, divorced, and not reported, has also been drawn from Table I.

Total	9,123	100.00	7,937	100.00	17,060	100.00

Taking Baltimore, which does not differ materially from the other cities, we see that the single males constitute 58.73 per cent of all males, while the single females are 53.31 per cent of all females. The aggregate of single persons is 10,109, or 56.01 per cent of the entire number of persons. The married males are 38.21 per cent of all males and the married females 37.84 per cent of all females, while the total married persons constitute 38.02 per cent of all persons reported. A small proportion were reported as widowed, the male widowed being 2.72 per cent of all males, the female 8.71 per cent of all females, and the total widowed 5.73 per cent of all persons involved. Less than one-seventh of one per cent of males, females, or total persons were reported as divorced.

The following table taken from the eleventh census of the United States shows similar facts for the entire population of the four cities:

NUMBER AND PER CENT OF PERSONS OF EACH CONJUGAL CONDITION, BY SEX, FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

By comparing the tables it is seen that as regards single persons there is invariably a smaller proportion in the slum districts than in the cities as a whole, while there is as invariably a larger proportion of married persons in the slum districts. A smaller proportion of widowed persons are found in the slums of each city, while the very small proportion of divorced persons varies, the proportion being the same for the slum and total population of Baltimore, the proportion for the slum being more than twice as great as for the total population in Chicago, while the proportion for the slum is but about one-sixth as great as for the total population in New York and Philadelphia.

An analysis of the conjugal condition of native and foreign born persons of the slum districts is given below, preceded by a table, also drawn from Table I.

By this table it is seen that in Baltimore 76.22 per cent of the native born males are single and 22.03 per cent are married. Of the foreign born males 32.98 per cent are single and 62.02 per cent are married. Taking up the females, we find that 71.69 per cent of the native born are single and 23.69 per cent are married, while of the foreign born 25.73 per cent are single and 59.08 per cent are married. This great disproportion in the percentages showing conjugal condition for native and foreign born persons of both sexes is also apparent in the other cities, and is doubtless due to the fact that the foreign born persons coming to this country are usually married or of marriageable age, while the native born include a great number of children who have necessarily been classed as single in this statement. This will be seen by reference to the tables on pages 35 to 37.

Some difficulty was experienced in making a table which would give similar information for the whole population of the four cities, owing to the fact that the census office subdivided persons of each conjugal con-

dition into native white, foreign white, and colored. The colored included blacks, mulattoes, quadroons, octoroons, Chinese, Japanese, and civilized Indians, and were not subdivided as native and foreign born. By reference to a preceding table, taken from the eleventh census, showing the number and per cent of native and foreign born, by color, for the whole population of each of the cities, it is seen that the number of persons classed as colored who are of foreign birth is less than three-tenths of one per cent of the whole population of the several cities. We have therefore considered the whole class as native born and made up a table on that basis. This small per cent of error could not affect the value of the table for comparative purposes. The table follows:

NUMBER AND PER CENT OF PERSONS OF EACH CONJUGAL CONDITION, BY SEX AND NATIVITY, FOR THE WHOLE POPULATION.

[From the eleventh census of the United States. A small number (less than three-tenths of one per cent of the whole population of the several cities) of blacks, mulattoes, quadroons, and octoroons, Chinese, Japanese, and civilized Indians, actually foreign born, are here classed as native born for the reasons stated in the preceding paragraph.]

The same disproportion in the percentages showing conjugal condition for native and foreign born persons is found in this table relating to the whole population as was found in the preceding one relating to the population of the slum districts.

A summary of the ages of the persons included in the investigation, subdivided as to sex and nativity, follows:

NUMBER AND PER CENT OF PERSONS UNDER EACH AGE PERIOD, BY SEX AND NATIVITY.

The great mass of native born persons in the slum districts of each of the four cities are seen to be under 25 years of age, the largest number being under the group of under 5 years, the number under the succeeding groups gradually growing smaller. The foreign born, on the other hand, mostly range between 20 and 40 years of age.

A table similar to the preceding one and showing the facts as regards age for the total population of the four cities follows:

NUMBER AND PER CENT OF PERSONS UNDER EACH AGE PERIOD, BY SEX AND NATIVITY, FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

As explained before in regard to another table, the colored population has in this table been considered as native born. A comparison of the two tables shows no material difference as regards age between the slum and total population of the cities under consideration, what has been said under the preceding tables relating to the slum population being true for the total population. In Baltimore there is an exception, in that the total foreign born mostly range between 40 and 60 years, instead of between 20 and 40, as in the slum district.

Table II.—Selected places of birth, by age periods and sex, pp. 114 to 117.—In this table are given the number of persons born in each specified country, subdivided as to age and sex, under the following age periods: Under 5 years, 5 to 9 years, 10 to 14 years, 15 to 19 years, 20 to 29 years, 30 to 39 years, 40 to 49 years, 50 to 59 years, 60 to 69 years, 70 to 79 years, 80 years or over, age not reported, and all ages. The foreign countries selected are Austria-Hungary, British America, China, France, Germany, Great Britain, Ireland, Italy, Netherlands, Norway and Sweden, Poland, Russia, Spain and Portugal, and other foreign and foreign not specified. The countries specified comprise the places of birth of all but a very small portion of the population of the districts canvassed, most of the number appearing under "other foreign and foreign not specified" belonging to the "not specified" class. In order to bring out more clearly the distribution of the people residing in the

slums, especially as regards place of birth, the following summary of Table II is given:

NUMBER AND PER CENT OF PERSONS BORN IN EACH SPECIFIED COUNTRY.

Spain and Portugal	2	.02	1	.01	3	.02
Other foreign and foreign not specified	146	1.60	80	1.01	226	1.33
Total foreign	5,804	63.62	4,508	56.80	10,312	60.45
Grand total	9,123	100.00	7,937	100.00	17,060	100.00

The per cent of native born of the two sexes differs very little. This is of course also true of the foreign born. Taking, then, the column showing the total number of persons born in each specified country, we see that in Baltimore those born in the United States were 59.79 per cent; in Chicago they were 42.49 per cent; in New York, 37.42 per cent, and in Philadelphia, 39.55 per cent. Of the foreign born by far the largest number in Baltimore were German born, the per cent being 23.90, the next in rank being Russia with 4.54 per cent, and Poland with 4.43 per cent. The foreign born of the Chicago district were most largely born in Italy, Austria-Hungary, Russia, and Poland. In New York, with 62.58 per cent foreign born, 45.27 per cent were Italians, while in Philadelphia 24.15 per cent were Italians, 13.64 per cent Russians, and 9.66 per cent Poles, but a small per cent being born in other foreign countries.

A table showing the number and per cent of the total population of each of the cities born in each specified country follows:

NUMBER AND PER CENT OF PERSONS BORN IN EACH SPECIFIED COUNTRY, FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

Place of birth.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

Spain and Portugal	56	.01	157	.01	963	.06	175	.02
Other foreign and foreign not specified	869	.20	12,168	1.11	15,510	1.02	5,023	.48
Total foreign	69,003	15.88	450,666	40.98	639,943	42.23	269,480	25.74
Grand total	434,439	100.00	1,099,850	100.00	1,515,301	100.00	1,046,964	100.00

Comparing these figures relating to the total population with those given in the preceding table, relating to the population of the slum districts canvassed, it is shown that for the entire population of Chicago and New York there is a much smaller proportion of native born persons than is found in Baltimore and Philadelphia, the per cent being 59.02 for Chicago and 57.77 for New York, while Baltimore has 84.12 per cent and Philadelphia 74.26 per cent native born. Of course the per cent of foreign born persons is correspondingly large in Chicago and New York. In the slum districts of these cities the per cent of native born persons is also small. Baltimore, having the largest per cent of its total population native born, has also the largest per cent of native born slum population, the per cent being 59.79. Philadelphia, with the next largest per cent of native born total population, has next to the smallest per cent of native born slum population, the figures being surprisingly small, 39.55 per cent. Chicago and New York, with the smallest proportions of native born total population, have still smaller proportions of their slum population native born, the figures being 42.49 and 37.42 per cent, respectively. In order that the per-

centages of the total and of the slum population may be more readily compared, the facts are brought together in the following table:

PER CENT OF THE TOTAL POPULATION AND SLUM POPULATION BORN IN EACH SPECIFIED COUNTRY COMPARED.

Place of birth.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Per cent of total population.	Per cent of slum population.	Per cent of total population.	Per cent of slum population.	Per cent of total population.	Per cent of slum population.	Per cent of total population.	Per cent of slum population.

Russia	.93	4.54	.70	10.42	3.22	2.41	.75	13.64
Spain and Portugal	.01	.02	.01	.01	.06	.05	.02	.02
Other foreign and foreign not specified.	.20	.26	1.11	1.20	1.02	2.01	.48	1.33
Total foreign	15.88	40.21	40.98	57.51	42.23	62.58	25.74	60.45

Comparing the foreign born population we notice that in the total population of Baltimore 15.88 per cent were foreign born. Of these more than one-half, 9.37 per cent, were Germans, 3.08 per cent were Irish, those born in any other country constituting less than one per cent of the total population. As before stated, Germans constituted 23.90 per cent of the slum population in Baltimore, more than one-half the entire foreign born population of the slums, which was 40.21 per cent. The proportion of Irish in the slums was, however, less than the proportion for the whole city, Russians and Poles being the most numerous foreign born persons in the slums, after the Germans.

In the large foreign born population of Chicago, 40.98 per cent, Germans predominate, constituting 14.64 per cent, being followed by the Irish with 6.37 per cent, the Scandinavians with 5.90 per cent, those born in Great Britain with 3.56 per cent, Austro-Hungarians with 3 per cent, British Americans with 2.21 per cent, and Poles with 2.19 per cent, the proportion of persons from any other country being less than one per cent of the total population. In the slum districts of Chicago, however, with 57.51 per cent of the population foreign born, Italians predominate, constituting 16.73 per cent of the total slum population, followed by the Austro-Hungarians with 10.64 per cent, Russians with 10.42 per cent, Poles with 6.65 per cent, Germans with 4.75 per cent, and Irish with 4.46 per cent. The very large proportion of Germans, Scandinavians, and Irish in the total population of the city is noticeable. Reference to the table shows but a small proportion of Germans and Irish, and only eighteen one-hundredths of one per cent of Scandinavians resident in the slum district canvassed in Chicago.

The foreign born population of New York constitutes 42.23 per cent of the total population of the city. Of the foreign born persons the Germans, as in Baltimore and Chicago, are most numerous, the per cent being 13.91. They are closely followed by the Irish with 12.57 per cent. Next come the Russians with 3.22 per cent, those born in Great Britain with 3.19 per cent, Austro-Hungarians with 3.14 per cent, and Italians with 2.64 per cent, the proportion of persons born in any other country being less than one per cent of the total population. Glancing at the slum population we notice that with 62.58 per cent foreign born, the Germans and Irish constitute but a small proportion of the whole, the percentage being 2.49 and 5.21 respectively. Persons of Italian birth were most numerous, constituting 45.27 per cent of the total population of the slum districts. The next largest proportions were Irish with 5.21 per cent, Poles with 3.10 per cent, Germans with 2.49 per cent, and Russians with 2.41 per cent, those of any other nationality being less than one per cent of the total slum population.

Of the total population of Philadelphia 25.74 per cent are foreign born. Of these the largest proportion are Irish, constituting 10.60 per cent of the total population of the city. Germans come next with 7.16 per cent, and those born in Great Britain with 4.65 per cent, the proportion born in any other country being less than one per cent of the total population. The foreign born slum population of Philadelphia, on the other hand, constitutes 60.45 per cent of the total slum population. Italians, Russians, and Poles each constitute less than one per cent of the total population of the city. In the slum districts, however, Italians constitute 24.15 per cent of the total slum population, Russians 13.64 per cent, and Poles 9.66 per cent. The Irish follow next with 4.31 per cent, then the Germans with 3.19 per cent, and Austro-Hungarians with 2.83 per cent, the proportion born in any other country constituting less than one per cent of the total slum population.

Table III.—Number and size of families, by kind of family, pp. 118, 119.—The census practice has been followed in this investigation, and not only has the private or normal family been considered as falling under the term family, but also every group of individuals living under one roof and bearing some relation to one head, whether the relation be one of kin or merely an arbitrary one. Accordingly the families of the slum districts of each city are here presented by the kind of family, as private families, hotels, boarding houses, lodging houses, etc. For each of the specified kinds of families is shown the number composed of from 1 person up to 25 persons, in detail. Those composed of 26 persons or over, a very small proportion, are grouped in one column. Taking each city in its order, we see from this table that in the districts canvassed in Baltimore there were 4,028 families, of which 3,994 were private, 32 boarding houses, and 2 hotels. These 4,028 families were composed of 18,048 individuals, making an average of 4.48 persons to each family. In this city it will be seen that families of 3 persons are most numerous. As in Baltimore, so in Chicago, New York, and Phila-

delphia, families designated as private preponderate greatly over those designated as boarding houses, lodging houses, and hotels. As stated above, the average size of the family in Baltimore is 4.48 persons. The other cities show a larger average, Chicago having an average of 5.09, New York, 4.90, and Philadelphia, largest of all, 5.15. Families of 4 persons preponderate in Chicago, as against 3 in Baltimore, while in New York and Philadelphia families of 5 persons are most numerous.

The census returns afford no means of determining the distribution of the entire population of the four cities as regards kind of family, but show the number of families composed of from 1 to 20 persons, and of 21 persons and over.

NUMBER AND SIZE OF FAMILIES FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

Families of—	Baltimore.	Chicago.	New York.	Philadelphia.
1 person	2,305	4,157	9,638	3,907
2 persons	11,477	28,372	48,292	24,666
3 persons	13,945	37,080	56,095	34,118
4 persons	14,357	39,811	54,806	35,942
5 persons	13,524	36,350	48,686	33,119
6 persons	10,387	26,920	34,150	25,333
7 persons	7,827	18,851	23,447	18,003
8 persons	5,416	12,100	15,075	12,190
9 persons	3,398	7,178	9,168	7,579
10 persons	2,176	4,999	7,507	5,492
11 persons	743	1,282	1,549	1,709
12 persons	463	777	963	1,046
13 persons	225	494	653	585
14 persons	102	359	436	372
15 persons	80	296	404	257
16 persons	45	160	265	135
17 persons	37	159	204	118
18 persons	14	110	171	99
19 persons	21	118	145	54
20 persons	29	191	303	106
21 persons or over	133	556	808	305
Total families	86,654	220,320	312,766	205,135
Average size of family	5.01	4.99	4.84	5.10

The table shows that in Baltimore, taking the total population into consideration, families of 4 persons preponderate as against families of 3 persons in the slum district canvassed, while the average size of family in the whole city is 5.01 persons, and in the slum district 4.48 persons. Of the whole population of Chicago families of 4 persons predominate, the average size being 4.99 persons; in the slum district of the city families of 4 persons also predominate, the average size being 5.09 persons. Families of 3 persons predominate in New York, the average size being 4.84 persons; in the slum district of that city families of 5 are most numerous, the average size being 4.90 persons. In Philadelphia families of 4 persons are most numerous, the average size being 5.10 persons; in the slum district families of 5 persons predominate, the average size being 5.15. The following table presents these facts in tabular form, and shows the slum families to be slightly larger than the size for the whole city in Chicago, New York, and Philadelphia, while in Baltimore the families of the slums are considerably smaller than those for the whole city.

PREPONDERATING FAMILIES AND AVERAGE SIZE OF FAMILIES, FOR THE SLUM POPULATION AND TOTAL POPULATION COMPARED.

City.	Slum population.		Total population.	
	Preponderating families.	Average size of family.	Preponderating families.	Average size of family.
Baltimore	3 persons	4.48	4 persons	5.01
Chicago	4 persons	5.09	4 persons	4.99
New York	5 persons	4.90	3 persons	4.84
Philadelphia	5 persons	5.15	4 persons	5.10

Table IV.—Nativity of parents, p. 120.—Table III shows parent nativity classified as follows: Both parents native; both parents foreign; father native, mother foreign; father foreign, mother native. Under each classification are shown the total individuals and total native and foreign born males and females. From the general table we draw the following summary, which brings out more clearly the number and per cent of the native born, foreign born, and total persons falling under each classified parent nativity:

NUMBER AND PER CENT OF PERSONS OF EACH CLASSIFIED PARENT NATIVITY.

Parent nativity.	Native born.		Foreign born.		Total.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
BALTIMORE.						
Both parents native	4,232	39.22	3	.04	4,235	23.47
Both parents foreign	5,324	49.34	7,252	99.92	12,576	69.68
Father native, mother foreign	450	4.17	2	.03	452	2.50
Father foreign, mother native	784	7.27	1	.01	785	4.35
Total	10,790	100.00	7,258	100.00	18,048	100.00
CHICAGO.						
Both parents native	1,945	23.18	12	.1	1,957	9.91
Both parents foreign	5,813	69.28	11,340	99.85	17,153	86.86
Father native, mother foreign	230	2.74	3	.03	233	1.18
Father foreign, mother native	403	4.80	2	.02	405	2.05
Total	8,391	100.00	11,357	100.00	19,748	100.00
NEW YORK.						
Both parents native	1,382	12.74	.....	.....	1,382	4.77
Both parents foreign	8,710	80.28	18,143	99.98	26,853	92.61
Father native, mother foreign	241	2.22	1	.01	242	.83
Father foreign, mother native	517	4.76	2	.01	519	1.79
Total	10,850	100.00	18,146	100.00	28,996	100.00
PHILADELPHIA.						
Both parents native	1,534	22.73	1	.01	1,535	9.00
Both parents foreign	4,704	69.71	10,309	99.97	15,013	88.00
Father native, mother foreign	129	1.91	1	.01	130	.76
Father foreign, mother native	381	5.65	1	.01	382	2.24
Total	6,748	100.00	10,312	100.00	17,060	100.00

From this table we see that in Baltimore 23.47 per cent of all persons concerned are of native, 69.68 per cent of foreign, and 6.85 per cent of mixed parentage. In Chicago but 9.91 per cent are of native parentage, in Philadelphia 9 per cent, and in New York smallest of all, 4.77

per cent. The percentages of persons of foreign parentage are of course correspondingly large, those of mixed parentage constituting but a small proportion of the persons enumerated.

The facts for the parent nativity of the total population of the four cities as shown by the eleventh census of the United States are not given in as great detail as would be necessary for comparison with the preceding table relating to the parent nativity of the slum population. In the census work persons of mixed parentage are considered as of foreign parentage, and no distinction is made as to the parent nativity of native and foreign born persons, only the parent nativity of the total population being given. The facts given in the preceding table have, therefore, been reduced to the form of the census table and are given in connection therewith below:

PARENT NATIVITY OF THE SLUM POPULATION AND TOTAL POPULATION COMPARED.

City.	Slum population.				Total population.			
	Of native parentage.		Of foreign parentage.		Of native parentage.		Of foreign parentage.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Baltimore	4,235	23.47	13,813	76.53	253,429	58.33	181,010	41.67
Chicago	1,957	9.91	17,791	90.09	243,096	22.10	856,754	77.90
New York	1,382	4.77	27,614	95.23	296,083	19.54	1,219,218	80.46
Philadelphia	1,535	9.00	15,525	91.00	454,622	43.42	592,342	56.58

Persons of foreign parentage are largely in excess in the slum districts. The proportion for each of the cities is as follows; Baltimore, 76.53 per cent; Chicago, 90.09 per cent; New York, 95.23 per cent; and Philadelphia, 91 per cent. Taking into consideration the whole population of each of the four cities, Baltimore shows 41.67 per cent of foreign parentage; Chicago, 77.90 per cent; New York, 80.46 per cent; and Philadelphia, 56.58 per cent. The invariably larger proportion of persons of foreign parentage in the slum districts, as compared with the total population of each of the four cities, is noticeable.

Table V.—Relationship to head of family, by nativity and sex, pp. 121 to 125.—The distribution of the native and foreign born male and female population of the slum districts canvassed, according to the relationship to head of family, is shown in this table for each city. Taking first the city of Baltimore, we see that of 10,790, the total number of native born persons, 1,333, or 12.35 per cent, were heads of families; of the 7,258 foreign born persons, 2,695, or 37.13 per cent, were heads of families; and that taking into consideration both native and foreign born, 22.32 per cent were heads of families. The per cent of heads of families for the other cities was as follows: Chicago, native born, 7.16 per cent, foreign born, 28.88 per cent, total, 19.65 per cent; New York, native born, 4.23 per cent, foreign born, 30.04 per cent, total, 20.38

per cent; Philadelphia, native born, 7.08 per cent, foreign born, 27.51 per cent, total, 19.43 per cent. The same reason as was advanced to account for the disproportion in the number of native and foreign born single and married persons (page 33), namely, that foreign born persons coming to this country are usually married or of marriageable age, while the native born include a great number of children, will doubtless explain the great difference noticeable in this table in the proportion of native and foreign born persons classified as sons and daughters, as well as the corresponding difference in the other leading relationships, namely, heads of families and wives. Eliminating the element of nativity, a few more illustrations will suffice to explain the facts contained in this table. In Baltimore, 3,204, or 17.75 per cent of the total number, were wives of the heads of the families in which they lived, while 8,696, or 48.18 per cent, were sons and daughters; in Chicago, the wives were 16.11 per cent and the sons and daughters 43.33 per cent. In New York, 16.78 per cent were wives and 41.19 per cent sons and daughters; and in Philadelphia, 16.40 per cent were wives, the sons and daughters being 45.31 per cent.

Table VI.—Voters and aliens, p. 126.—In the preparation of the tables in this report all males 21 years of age or over, either native born or naturalized foreign born, have been considered voters. All males of foreign birth 21 years of age or over who were not naturalized have been termed aliens. Table VI shows for each city the males of the slum districts, 21 years of age or over, classified as native born and foreign born voters and aliens. It also shows the total foreign born males 21 years of age or over, and the percentages of native and foreign born voters of total voters, aliens of total foreign born males 21 years of age or over, and voters and aliens of total males 21 years of age or over. By reference to the table it will be seen that of the total voting population of the district canvassed in Baltimore 44.04 per cent were foreign born. The per cents for the other cities run still higher, being 61.31 for Chicago, 62.44 for New York, and 58.94 for Philadelphia. The next column of percentages shows the proportion of foreign born males 21 years of age or over who are still aliens. The per cent is large, being 42.81 in Baltimore, 52.51 in Chicago, 67.86 in New York, and 70.36 in Philadelphia. The per cent of voters of total males, both native and foreign born, 21 years of age or over, is shown in the next column, ranging from 41.68 in Philadelphia to 75.21 in Baltimore, while the last column shows the per cent of aliens of total males 21 years of age or over.

The following table, similar in form to Table VI, shows the facts for the entire population of each of the four cities:

VOTERS AND ALIENS, FOR THE WHOLE POPULATION.

[From the eleventh census of the United States. In this table all males 21 years of age or over, either native born or naturalized, are considered as voters. Aliens include all males of foreign birth 21 years of age or over who have not been naturalized.]

City.	Native born.	Foreign born.	Total.	Aliens.	Total foreign born males 21 years of age or over.	Per cent of—				
						Native born voters of total voters.	Foreign born voters of total voters.	Aliens of total foreign born males 21 years of age or over.	Voters of total males 21 years of age or over.	Aliens of total males 21 years of age or over.
Baltimore	86,797	21,871	108,668	7,990	29,861	79.87	20.13	26.76	93.15	6.85
Chicago	133,109	136,425	269,534	62,059	198,484	49.38	50.62	31.27	81.28	18.72
New York	177,729	177,207	354,936	91,862	269,069	50.07	49.93	34.14	79.44	20.56
Philadelphia	191,785	80,310	272,095	35,179	115,489	70.48	29.52	30.46	88.55	11.45

The column giving the per cent of voters who are foreign born in each of the cities, compared with the same column of Table VI, showing the same percentages for the slum districts only, shows an invariably larger per cent of foreign born voters in the slum districts. In Baltimore but 20.13 per cent of all voters are foreign born, while 44.04 per cent of the voters of the slum districts are foreign born. The figures for Chicago do not differ so greatly, being 50.62 per cent for the whole city and 61.31 per cent for the slum districts. New York shows 49.93 per cent for the whole city and 62.44 per cent for the slum districts, while in Philadelphia we find the greatest difference, 29.52 per cent of total voters and 58.94 per cent of slum voters being foreign born. The column immediately following shows the proportion of foreign born males 21 years of age or over who are still aliens. Again, much the larger proportion is found among the population of the slums, the greatest difference being in Philadelphia, where of the total population but 30.46 per cent of the males 21 years of age or over are still aliens, while of the slum population canvassed 70.36 per cent are still aliens. New York follows with 34.14 per cent of aliens in the total and 67.86 per cent in the slum population. Chicago shows 31.27 per cent of aliens in the total and 52.51 per cent in the slum population, while the smallest difference is found in Baltimore, where 26.76 per cent of the total foreign born males 21 years of age or over and 42.81 per cent of those resident in the slums are aliens. The next two columns show, respectively, the per cent of all males 21 years of age or over who are voters and the per cent who are aliens. Taking up the last of these two columns we notice that of the total population of the four cities 21 years of age or over the per cent of aliens ranges as follows: In Baltimore, 6.85 per cent; in Philadelphia, 11.45 per cent; in Chicago, 18.72 per cent, and in New York, 20.56 per cent. Comparing these figures with those for the slum population as shown in Table VI, we see a very much larger proportion there, the per cent of aliens being 24.79 in Baltimore, 40.40 in Chicago, 56.87 in New York, and 58.32 in Philadelphia. These figures show that the slum residents

have to a great extent failed to become naturalized, although qualified to do so, and that this condition is much worse for the slum than for the total population of the four cities.

Table VII.—Foreign born voters and aliens, by selected places of birth, pp. 126, 127.—This table shows the foreign born males 21 years or age or over by selected places of birth, classified as voters and aliens. It also shows the per cent born in each country who are now voters of still aliens and the per cent of the total foreign born voters and total aliens born in each country. The extent to which the males of different nationalities become citizens in the sense of voters is shown in the first column of percentages, and is followed by the per cent of aliens from the corresponding countries. For example, the table for Baltimore shows that of the males 21 years of age or over born in Poland but 31.74 per cent have become voters, 68.26 per cent still being aliens. Poland, Italy, and Russia show a uniformly large per cent of aliens in all the cities, while Germany, Great Britain, Ireland, the Netherlands, and Norway and Sweden show a comparatively small per cent. The last two columns of this table bring out very clearly the distribution of the foreign born voters and aliens by nationality. In Baltimore 63.29 per cent of the foreign born voters of the districts canvassed were Germans, the next countries contributing most largely being Ireland with but 9.89 per cent, and Russia with 7.42 per cent. Of the aliens Germany furnished a majority of all, 54.17 per cent, Poland having 16.51 per cent and Russia 11.81 per cent. That portion of the table relating to Chicago shows Austria-Hungary, Italy, Ireland, Germany, and Russia to have furnished the largest proportion of voters in the order named, while of the aliens the greatest number were born in Italy, being 44.91 per cent of all aliens, Russia and Poland following with 17.28 and 12.48 per cent, respectively. In the New York districts Italy furnished 43.24 per cent of the voters and Ireland 21.84 per cent; of the aliens 83.09 per cent were Italians. In Philadelphia Italy, Ireland, Germany, Russia, and Poland furnished the greatest number of voters, while 56.91 per cent of the aliens were born in Italy, 18.08 per cent in Russia, and 13.28 per cent in Poland.

Table VIII.—Aliens, by selected places of birth and age periods, pp. 128, 129.—The alien population of the slums, consisting of all foreign born males 21 years of age or over who have not been naturalized, is here shown by place of birth and by ages by periods of years. For each country of birth the aliens are grouped under the following age periods: 21 to 29 years, 30 to 39 years, 40 to 49 years, 50 to 59 years, 60 to 69 years, 70 to 79 years, and 80 years or over. For a comparatively small number the age was not reported. The distribution of the aliens by countries of birth in the districts canvassed has been discussed in the previous table. In Baltimore, Chicago, and Philadelphia the greatest number of aliens fall under the age period, 21 to 29 years, the number growing smaller under each succeeding period. In New York, however, 1,743 aliens were between 30 and 39 and but 1,604 between 21 and 29.

Table IX.—Aliens, by occupations and selected places of birth, pp. 130 to 147.—In this table the detailed occupations engaged in by the alien population of the slum districts are shown by selected places of birth. It is possible from this table to ascertain whether or not aliens of similar nativities drift into the same pursuits and, if so, the extent to which it is the case. As in other tables relating to occupations, the classification adopted by the United States census office has been followed, except in cases of occupations at which a large number were found at work, but which were not shown separately in the census classification. No explanation of the table itself is necessary, the facts being plainly stated. The following summary shows the number falling under each of the great groups of occupations in each city:

NUMBER AND PER CENT OF ALIENS IN EACH OCCUPATION GROUP.

Groups of occupations.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Agriculture, the fisheries, and mining	35	2.89	4	.16	18	.33	5	.17
Professional	13	1.07	57	2.26	107	1.98	58	1.93
Domestic and personal service	441	36.42	1,037	41.10	2,089	38.64	998	33.29
Trade and transportation	258	21.31	530	21.01	1,197	22.14	614	20.48
Manufactures and mechanical industries	408	33.69	687	27.23	1,506	27.86	1,143	38.13
Non-productive	56	4.62	208	8.24	489	9.05	180	6.00
Total	1,211	100.00	2,523	100.00	5,406	100.00	2,998	100.00

A very large per cent of the aliens in each of the four cities are seen to be engaged in occupations falling under the general group of domestic and personal service. Indeed, for three of the cities—Baltimore, Chicago, and New York—the largest per cents fall under this group, while in Philadelphia the greatest proportion are engaged in manufactures and mechanical industries. A uniformly large per cent in all the cities are engaged in trade and transportation and manufactures and mechanical industries. The small number classed as non-productive is worthy of notice. Reference to Table IX itself will show the numbers engaged in each specified occupation under each of these groups.

Table X.—Years in the United States of foreign born males 21 years of age or over, by selected places of birth, pp. 148 to 151.—This table shows for each of the selected places of birth the number of foreign born males 21 years of age or over who have been in the United States the number of years specified in the first column.

Table XI.—Years in the United States of aliens, by selected places of birth, pp. 150 to 153.—This table shows for each of the selected places of birth the number of aliens who have been in the United States the number of years specified in the first column. Taken in connection with Table X, it shows the proportion of persons born in each country who have resided in this country a specified number of years but who have not availed themselves of the privilege of becoming citizens of

the United States in the sense of being naturalized. Naturally, the number who have been in this country less than five years would constitute the majority, as five years are required to complete naturalization. From five to fifteen years the number gradually diminishes, comparatively few aliens having been in the United States over fifteen years.

Table XII.—Years in the United States of foreign born males 21 years of age or over, by voters and aliens, pp. 154, 155.—This table is drawn from the two preceding tables. The foreign born males 21 years of age or over who have resided in the United States each specified number of years are classified as voters and aliens. The last two columns of the table show this classification in the form of percentages. Looking at the table for Baltimore, for example, we find that of the foreign born males 21 years of age or over who had been in the United States from five to nine years, 33.83 per cent were voters, while 66.17 per cent were still aliens. Of those who had been here from ten to fourteen years, the proportion of voters had almost doubled, being 61.79 per cent, the aliens having decreased to 38.21 per cent. Of those who had been here from fifteen to nineteen years, the voters constituted 80.28 per cent and the aliens 19.72 per cent. From this on, with here and there a break, the proportion of voters gradually grows larger and that of the aliens correspondingly smaller. The other cities show similar results.

Table XIII.—Illiterate aliens, by degree of illiteracy, selected places of birth, and age periods, pp. 156 to 159.—A detailed showing is here made of the ages of the aliens, by periods of years, for those falling under each of the two degrees of illiteracy, viz: "Unable to read and write," and "Unable to write." In addition to this, the country of birth is specified under each degree of illiteracy. The definition of illiteracy, as used in this report, includes all persons 10 years of age or over who either can not write or can neither read nor write any language. The entire number of illiterate aliens in the districts canvassed in each city is given in the short table below, together with the number and per cent falling under each of the age periods. The details for each country of birth and degree of illiteracy may be seen by reference to Table XIII itself.

NUMBER AND PER CENT OF ILLITERATE ALIENS UNDER EACH AGE PERIOD.

Age periods.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
21 to 29 years	117	24.02	363	30.35	829	25.82	444	28.78
30 to 39 years	141	28.95	322	26.92	1,018	31.70	403	26.12
40 to 49 years	104	21.36	208	17.39	654	20.37	269	17.43
50 to 59 years	70	14.37	63	5.27	317	9.87	132	8.56
60 to 69 years	26	5.34	33	2.76	121	3.77	54	3.50
70 to 79 years	11	2.26	9	.75	47	1.46	9	.58
80 years or over	4	.82	3	.25	8	.25	5	.32
Age not reported	14	2.88	195	16.31	217	6.76	227	14.71
Total	487	100.00	1,196	100.00	3,211	100.00	1,543	100.00

Table XIV.—Illiterate aliens and total aliens compared, by selected places of birth, pp. 160, 161.—A comparison is here made of the total aliens and of the illiterate aliens by each country of birth. The fourth and fifth columns of the table show in the form of percentages the proportion of the total aliens and of the illiterate aliens born in each specified country, and the last column gives the per cent of the illiterate of the total aliens. This column shows very clearly for each country the proportion of the aliens born in each, who are illiterates. In Baltimore the per cent of illiterate aliens of total aliens is seen to be 40.21 per cent. The per cent of illiterates is largest for those born in Poland, being 54 per cent, while for the Italians the per cent is 51.16, for the Irish 45.45, for the Germans 38.57, for the Chinese 33.33, etc. The per cent of illiterate aliens for Chicago is somewhat larger than that for Baltimore, being 47.40 per cent. For New York it is still higher, being 59.40 per cent, while for Philadelphia it is 51.47 per cent. For Chicago the proportion of illiterate aliens was much the greatest, owing to those born in Italy, being 72.46 per cent. In both the New York and Philadelphia districts also the Italians show the greatest proportion, the percentages being 64.45 for New York and 64.60 for Philadelphia.

Table XV.—Illiterate aliens and illiterate foreign born males 21 years of age or over, by selected places of birth, pp. 162, 163.—This table gives in parallel columns for each country of birth the number of aliens and foreign born males 21 years of age or over, and the number of illiterate aliens and foreign born males 21 years of age or over. Immediately following each, respectively, is shown the per cent of the foreign born males 21 years of age or over who are aliens, and the per cent of the illiterate foreign born males 21 years of age or over who are aliens. These two columns of percentages afford some very interesting comparisons. Taking up the table for Baltimore we see that of the whole number of illiterate foreign born males 21 years of age or over, the illiterate aliens constitute 66.62 per cent, while aliens as a whole constitute 42.81 per cent. The illiterate aliens born in Germany constitute 65.71 per cent of the German born males 21 years of age or over, while all German born aliens constitute 39.05 per cent. The percentages for the other countries of birth and for the other cities may be similarly analyzed.

Table XVI.—Occupations, by sex and selected places of birth, pp. 164 to 211.—This table shows the occupations of males and females, and for each the number of persons born in each specified country. In presenting these occupations the classification adopted by the eleventh United States census has been generally adhered to. In a few instances where some occupations which contained a large number of persons would have been lost in the general class into which they would have fallen, they have been given separately. The eight general industrial groups under which the occupations have been classed are as follows: Agriculture, the fisheries, and mining; professional; domestic and personal service; trade and transportation; manufactures and

mechanical industries; non-productive (not gainful); housewives and at work; and scholars and at work. The following summary serves to show under each group the number and per cent of males and females, and also the per cent of persons under each group of the total persons:

NUMBER AND PER CENT OF PERSONS UNDER EACH INDUSTRIAL GROUP.

Groups of occupations.	Males.		Females.		Total.		Per cent of persons under each group.
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

The relative number of each sex engaged in the various industrial groups is clearly shown. For example, take the figures for Baltimore. It is seen that 82.89 per cent of the 76 persons engaged in agriculture, the fisheries, and mining were males and 17.11 per cent were females; of the 112 persons engaged in professional pursuits, 84.82 per cent were males and 15.18 per cent females; of the 2,032 engaged in domestic and personal service, 82.92 per cent were males and 17.08 per cent females; of the 1,851 engaged in trade and transportation, 90.11 per cent were males and 9.89 per cent females; of the 2,982 engaged in manufactures and mechanical industries, 70.72 per cent were males and 29.28 per cent females; of the 10,607 classed as non-productive or not gainful, 31.80

per cent were males and 68.20 per cent females; of the 384 persons doing their own housework and also being at work, all were, of course, females, while of the very small number of those both at school and at work, 75 per cent were males and 25 per cent females. The figures for the other cities may be used in a similar manner. Glancing at the last column, which shows the proportion of persons falling under each industrial group, we see that in all the cities the non-productive or not gainful group is the largest, comprising 58.77 per cent of all persons in Baltimore, 57.04 per cent in Chicago, 57.12 per cent in New York, and 57.46 per cent in Philadelphia. In each of the cities the group of manufactures and mechanical industries is next in point of size, ranging from 14.69 per cent in Chicago to 17.27 per cent in Philadelphia. The next largest number in each of the cities were engaged in domestic and personal service and the next in trade and transportation. A very small proportion of all persons fall under the other groups. The tenth census of the United States shows that the proportion of the total population engaged in productive or gainful occupations was as follows for each of the cities: Baltimore 39.23, Chicago 38.11, New York 42.56, and Philadelphia 41.19 per cent. Reference to the table shows that of the slum population the following proportion was so engaged in each city: Baltimore 41.23, Chicago 42.96, New York 42.88, and Philadelphia 42.54 per cent. The difference in the proportion for the total and for the slum population is seen to be slight.

A table showing in the form of percentages the distribution of persons of different nationalities among the eight general groups has been drawn from Table XVI and is given below:

PER CENT OF PERSONS IN EACH GENERAL GROUP OF OCCUPATIONS, BY SELECTED PLACES OF BIRTH.

Place of birth.	Groups of occupations.								Total.
	Agriculture, the fisheries, and mining.	Professional.	Domestic and personal service.	Trade and transportation.	Manufactures and mechanical industries.	Non-productive.	Housewives and at work.	Scholars and at work.

Taking up the percentages for Baltimore, we see that 18.42 per cent of persons engaged in agriculture, the fisheries, and mining, were native born, and 81.58 per cent foreign born. Of the foreign born, 56.58 per cent were Germans, and 17.10 per cent Poles. In professional pursuits 55.36 per cent were native and 44.64 per cent foreign born, 16.07 per cent being Italians and 12.50 per cent Germans. In domestic and personal service 44.78 per cent were native and 55.22 per cent foreign born, the majority of the foreign born being Germans. The Germans also outnumber the other foreign born engaged in trade and transportation, and manufactures and mechanical industries. In trade and transportation 54.02 per cent of the employés were native and 45.98 per cent foreign born, and in manufactures and mechanical industries 47.95 per cent were native and 52.05 per cent foreign. The greater proportion of persons classed as non-productive were native born, the percentage being 67.98, while those classed as housewives and at work, and scholars and at work, were largely foreign born, the percentage of the former who were foreign born being 57.81 and the latter 75. The percentages for the other cities may be used in a similar manner. In Chicago, New York, and Philadelphia, it will be seen that persons engaged in occupations falling under the various groups are largely foreign born, except in the case of those classed as non-productive, who are very nearly equally divided as regards nativity.

Table XVII.—Weekly earnings and days and hours of labor, by occupation and sex, pp. 212 to 459.—This table shows the slum population engaged in remunerative occupations classified as in the preceding table. For each occupation is given the number of males and females at each different rate of weekly earnings, and days and hours of work per week.

From this table has been made a summary, showing the average weekly earnings of all persons engaged in remunerative occupations, classified by occupations, sex, and average weekly earnings.

Another short summary, also drawn from Table XVII, shows the hours of labor per week of all persons engaged in remunerative occupations, classified by occupations, sex, and hours per week.

In the slum districts canvassed in Baltimore it is found that 7,441 persons were engaged in remunerative occupations, and that the average weekly earnings per individual were $8.65½. In Chicago 8,483 persons earned on an average $9.88½ each per week. In New York 12,434 persons earned on an average $8.36 each per week. In Philadelphia 7,257 persons earned on an average $8.68 each per week. As has been shown already on page 53, those engaged in remunerative occupations in the several cities constitute the following proportions of the total population of the slum districts canvassed: Baltimore 41.23, Chicago 42.96, New York 42.88, and Philadelphia 42.54. Reducing the average weekly earnings to the basis of earnings per family per week it is found that in the slum district canvassed in Baltimore 4,028 families earned on an average $15.99 each per week, in Chicago 3,881 families $21.60½ each, in New York 5,912 families $17.58 each, in Philadelphia 3,313 families $19.01½ each. These figures, it should be borne in mind, are for the whole number of families in the slum districts canvassed.

From the summary relating to the hours of labor it is seen that the average hours of labor per week for the persons in the districts canvassed were, in Baltimore, 64.21; in Chicago, 60.94; in New York, 62.55, and in Philadelphia, 62.47. The average hours for the males and females differ very slightly, except in New York, where the average for males is 63.65 and for females 58.86. In each city by far the greatest number is found in the class working sixty or under sixty-six hours per week. A large number is found in the classes working less than sixty hours per week, while the number in the class working the longest hours, ninety or over per week, is considerable.

Table XVIII.—Classified weekly earnings, by sex and occupation, pp. 460 to 501.—In this table the eight general classes of occupations are subdivided as to sex, and a line given for each specific occupation. The number in each occupation is then classified as to weekly earnings, as follows: Under $1.50; $1.50 or under $1.75; $1.75 or under $2.00; $2.00 or under $2.50; $2.50 or under $3.00; $3.00 or under $3.50; $3.50 or under $4.00; $4.00 or under $4.50; $4.50 or under $5.00; $5.00 or under $6.00; $6.00 or under $7.00; $7.00 or under $8.00; $8.00 or under $9.00; $9.00 or under $10.00; $10.00 or under $11.00; $11.00 or under $12.00; $12.00 or under $13.00; $13.00 or under $14.00; $14.00 or under $15.00; $15.00 or over, and earnings not reported. This table is still further summarized in the statement given below in which persons are classed as earning under $5.00, $5.00 or under $10.00, and $10.00 or over.

Table XIX.—Persons unemployed, by months unemployed, sex, and age periods, pp. 502 to 505.—The inquiry with regard to persons unemployed, as well as the remainder of the investigation, covers the year ending March 31, 1893. In considering this subject all persons have been excluded who were under 15 years of age, or who were not engaged in productive and remunerative occupations. This unproductive class consists of housewives and others performing housework with no pay, retired persons, persons attending schools or colleges, those having no occupation, persons belonging to religious orders and receiving no pay, those for whom the occupation has been returned as unknown or not specified, and finally a miscellaneous group, composed of beggars, bookmakers at race tracks, gamblers, horse jockeys, prostitutes, prize fighters, etc. Those who were unemployed fractional parts of months during the year of the investigation have been classed under the nearest whole month, while those unemployed less than a half month have been excluded. Table XIX shows for each city the number of males and females unemployed each specified number of months, by age periods, and includes all persons 15 years of age or over engaged in remunerative occupations. The results of the investigation so far as it relates to the unem-

ployed of the slum districts are clearly shown in the following short table:

PERSONS UNEMPLOYED AND AVERAGE MONTHS UNEMPLOYED.

City.	Total population of the slum districts canvassed.	Slum population unemployed.		Months unemployed.	
		Number.	Per cent.	Total.	Average.
Baltimore	18,048	1,564	8.67	a 5,255	a 3.6
Chicago	19,748	3,135	15.88	a 7,327	a 3.1
New York	28,996	2,615	9.02	a 6,116	a 3.1
Philadelphia	17,060	2,591	15.19	a 5,132	a 2.9

a Not including those for whom the months unemployed were not reported.

Table XX.—Illiterates, by degree of illiteracy, selected places of birth, age periods, and sex, pp. 506 to 513.—This table deals with the degree of illiteracy of illiterate persons 10 years of age or over, showing their place of birth, age, and sex. To indicate the extent to which persons are illiterate, a classification has been made of those who can neither read nor write, and those who can not write but can read. The ages are here shown for these two classes by periods of years in order that the number of illiterate young and old persons may be known. By reference to the places of birth one may see what countries contribute most largely to this class of the slum population. A number of summaries following will serve to bring out more clearly and in more compact form the important points in regard to illiteracy:

NUMBER AND PER CENT OF NATIVE AND FOREIGN BORN ILLITERATES.

Nativity.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Native born	531	20.31	252	6.69	340	3.38	262	5.69
Foreign born	2,083	79.69	3,514	93.31	9,728	96.62	4,340	94.31
Total	2,614	100.00	3,766	100.00	10,068	100.00	4,602	100.00

It is clearly shown that the greater part of the illiterates of the slum districts are foreign born, the proportion being 79.69 per cent in Baltimore, 93.31 per cent in Chicago, 96.62 per cent in New York, and 94.31 per cent in Philadelphia. In order to ascertain what difference, if any, may exist in this respect as regards the total population of the cities involved, the following table is given:

NUMBER AND PER CENT OF NATIVE AND FOREIGN BORN ILLITERATES FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

Nativity.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Native born	25,333	75.40	3,342	8.56	6,928	7.44	12,795	30.38
Foreign born	8,264	24.60	35,704	91.44	86,189	92.56	29,324	69.62
Total	33,597	100.00	39,046	100.00	93,117	100.00	42,119	100.00

This table, like several preceding ones, contains a small percentage of error, owing to the rearrangement of the figures for comparative purposes. This error amounts to less than three-tenths of one per cent, and owing to its smallness does not at all detract from the value of the table. As has been shown, 79.69 per cent of the illiterates of the slums of Baltimore were foreign born. From this table we see that of the whole illiterate population of the city but 24.60 per cent were foreign born. The facts for Chicago, New York, and Philadelphia are, however, quite different; 91.44 per cent of the total illiterates of Chicago, 92.56 per cent of those in New York, and 69.62 per cent of those in Philadelphia being foreign born, as against 93.31 per cent of the illiterate slum residents in Chicago, 96.62 per cent in New York, and 94.31 per cent in Philadelphia.

NUMBER AND PER CENT OF MALE AND FEMALE ILLITERATES.

Sex.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Males	1,094	41.85	1,878	49.87	4,889	48.56	2,178	47.33
Females	1,520	58.15	1,888	50.13	5,179	51.44	2,424	52.67
Total	2,614	100.00	3,766	100.00	10,068	100.00	4,602	100.00

As is seen, the distribution of the illiterates of the slum districts as to sex is comparatively uniform, more illiterate females than males having been reported.

The following table shows the distribution of the entire illiterate population of the four cities as to sex:

NUMBER AND PER CENT OF MALE AND FEMALE ILLITERATES FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

Sex.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Males	12,719	37.86	16,605	42.53	38,420	41.26	16,909	40.15
Females	20,878	62.14	22,441	57.47	54,697	58.74	25,210	59.85
Total	33,597	100.00	39,046	100.00	93,117	100.00	42,119	100.00

As shown in the table for the illiterates of the slum districts, so also the greater proportion of the illiterates in the whole population are females. The proportion, however, is invariably smaller for the slum districts than for the entire cities.

NUMBER AND PER CENT OF ILLITERATES UNDER EACH AGE PERIOD.

Age periods.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
10 to 14 years	160	6.12	253	6.72	610	6.06	241	5.24
15 to 20 years	250	9.57	364	9.66	897	8.91	463	10.06
21 to 30 years	646	24.71	1,103	29.29	2,674	26.56	1,376	29.90
31 to 50 years	1,070	40.93	1,431	38.00	4,157	41.29	1,716	37.29
51 years or over	469	17.94	348	9.24	1,269	12.60	525	11.41
Age not reported	19	.73	267	7.09	461	4.58	281	6.10
Total	2,614	100.00	3,766	100.00	10,068	100.00	4,602	100.00

As regards age, the greatest number of illiterates of the slum districts falls under the period between 31 and 50 years of age. In Baltimore 40.93 per cent of all illiterates are between 31 and 50, in Chicago 38 per cent, in New York 41.29 per cent, and in Philadelphia 37.29 per cent. The next largest number falls in the group of 21 to 30 years of age, followed by those under the group of 51 years or over. The comparatively small per cent of illiterates under 21 years of age is noticeable.

The following table shows the age of the entire number of illiterates in each of the four cities considered:

NUMBER AND PER CENT OF ILLITERATES UNDER EACH AGE PERIOD FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

Age periods.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
10 to 14 years	1,370	4.08	988	2.53	2,369	2.55	1,178	2.80
15 to 19 years	1,968	5.86	2,119	5.43	6,978	7.49	2,171	5.15
20 to 29 years	6,726	20.02	9,499	24.33	25,855	27.77	9,048	21.48
30 to 49 years	14,077	41.90	16,030	41.05	37,622	40.40	16,396	38.93
50 years or over	9,020	26.84	10,240	26.23	20,021	21.50	13,060	31.01
Age not reported	436	1.30	170	.43	272	.29	266	.63
Total	33,597	100.00	39,046	100.00	93,117	100.00	42,119	100.00

The slight difference in the age periods should be considered in comparing the two tables immediately preceding. The facts for the whole illiterate population as regards age, are not, however, materially different from those for the illiterates of the slum districts, the greatest number being found between 30 and 49 years of age, the next greatest numbers being found under 50 or over, and 20 to 29, a very small percentage being under 20 years of age.

NUMBER AND PER CENT OF ILLITERATES BORN IN EACH SPECIFIED COUNTRY.

Place of birth.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
United States	531	20.31	252	6.69	340	3.38	262	5.69

Norway and Sweden	3	.11	3	.08	.....	.....	.....	.....
Poland	343	13.12	363	9.64	424	4.21	565	12.28
Russia	221	8.46	509	13.52	350	3.47	814	17.69
Spain and Portugal	2	.08	.....	.....	6	.06	1	.02
Other foreign and foreign not specified.	11	.42	99	2.63	189	1.88	87	1.89
Total foreign	2,083	79.69	3,514	93.31	9,728	96.62	4,340	94.31
Grand total	2,614	100.00	3,766	100.00	10,068	100.00	4,602	100.00

The general distribution of the illiterates of the slum districts by native and foreign born has already been shown. This table, however, shows the distribution by states and countries of birth. In Baltimore, with 20.31 per cent of illiterates native born, 42.77 per cent were born in Germany, 13.12 per cent in Poland, 8.46 per cent in Russia, etc. In Chicago, with 6.69 per cent native born, 54.78 per cent were born in Italy, 13.52 per cent in Russia, and 9.64 per cent in Poland. In New York, with 3.38 per cent native born, 79.75 per cent were born in Italy, a very small per cent having been born in the other countries. In Philadelphia, with 5.69 per cent native born, 53.06 per cent were born in Italy, 17.69 per cent in Russia, and 12.28 per cent in Poland.

NUMBER AND PER CENT OF ILLITERATES OF EACH DEGREE OF ILLITERACY.

Degree of illiteracy.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Unable to read and write	2,411	92.23	3,609	95.83	9,870	98.03	4,485	97.46
Unable to write	203	7.77	157	4.17	198	1.97	117	2.54
Total	2,614	100.00	3,766	100.00	10,068	100.00	4,602	100.00

Comparing the illiterates of each degree in the slum districts we note that a very large proportion are unable to read and write, while a small per cent, varying from 1.97 in New York to 7.77 in Baltimore can read, but are unable to write.

Taking into consideration the whole illiterate population of each of the four cities, as shown in the following table, the same small per cent is shown for those who can read, but are unable to write. The proportion is, however, larger than that for the slum districts, being lowest in New York, with 10.33 per cent. Chicago follows with 15.12 per cent,

then Baltimore with 18.03 per cent, and Philadelphia, largest of all, with 19.70 per cent.

NUMBER AND PER CENT OF ILLITERATES OF EACH DEGREE OF ILLITERACY FOR THE WHOLE POPULATION.

[From the eleventh census of the United States.]

Degree of illiteracy.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Unable to read and write	27,541	81.97	33,144	84.88	83,494	89.67	33,821	80.30
Unable to write	6,056	18.03	5,902	15.12	9,623	10.33	8,298	19.70
Total	33,597	100.00	39,046	100.00	93,117	100.00	42,119	100.00

Table XXI.—Illiterates, by nativity, sex, and parent nativity, p. 514.—This table shows in brief form the parent nativity of the native and the foreign born male and female illiterates. For example, of 531 native born illiterates in Baltimore, 368 had both parents native born, 150 had both parents foreign born, while 13 were of mixed parentage. Naturally, nearly all of the 2,083 foreign born illiterates had both parents foreign born.

Table XXII.—Illiterates, by sex, occupation, and age periods, pp. 515 to 529.—This table presents the occupations of the illiterate class of the slums, showing in detail the occupations engaged in and the number so engaged who fall under the specified age periods. It should be borne in mind that illiterates, as treated here, include only persons 10 years of age or over who either can not write or can neither read nor write. This class, as shown by the tables, is engaged in the class of occupations requiring but little skill. By reference to the table it will be seen that the predominating occupations are laborers; launderers; servants; draymen, hackmen, teamsters, etc.; longshoremen and stevedores; peddlers, hucksters, and small merchants; road employés; tailors; meat, fruit, and oyster packers and canners; bootblacks; boarding and lodging house keepers; rag pickers; hod carriers; clothing makers; prostitutes and bawdy house keepers; organ grinders; saloon keepers; scissors grinders; and boot and shoe makers and repairers.

Table XXIII.—Persons illiterate as regards English, but literate as regards some other language, by selected places of birth, age periods, and sex, pp. 530 to 533.—This table shows by place of birth, age periods, and sex those persons who were unable to read and write the English language, but were, however, able to read and write some other language. The language used by these persons was almost invariably that of the country where born. Of this class 2,496 were found in Baltimore, 3,295 in Chicago, 3,565 in New York, and 2,307 in Philadelphia. Naturally, almost every one of these persons was foreign born. In Baltimore 1,611, or 64.54 per cent, were Germans; 310, or 12.42 per cent, Russians; 289, or 11.58 per cent, Poles; and 90, or 3.61 per cent, Italians. In Chicago the largest number were Austro-Hungarians, being 1.089, or 33.05 per cent of all; 666, or 20.21 per cent, were Russians;

587, or 17.82 per cent, Italians; 488, or 14.81 per cent, Poles; and 324, or 9.83 per cent, Germans. In New York the Italians largely predominate, being 2,776, or 77.87 per cent of all, while 225, or 6.31 per cent, were Germans; 199, or 5.58 per cent, Poles; 132, or 3.70 per cent, Chinese; and 128, or 3.59 per cent, Russians. The Italians also predominate in Philadelphia, being 935, or 40.53 per cent, the Russians following with 589, or 25.53 per cent; 404, or 17.51 per cent, were Poles; 155, or 6.72 per cent, Germans; and 145, or 6.28 per cent, Austro-Hungarians.

Table XXIV.—Illiterates and literates, by selected places of birth and sex, pp. 534, 535.—This table compares the literates and illiterates by place of birth and sex. The number of the male, female, and total persons 10 years of age or over born in each state or country, and falling under the following classes, are shown: Persons who read and write English; persons who read and write some other language than English, but who do not read and write English; and illiterates. The first and second divisions of the table represent the literate class, the third division the illiterate class, while both classes are summed up in the last division. The most important point to be considered in this connection is to ascertain for both the native and foreign born population of the districts canvassed what percentage of persons 10 years of age or over is illiterate. This is shown in the following summary drawn from Table XXIV:

NUMBER AND PER CENT OF ILLITERATES AND LITERATES BORN IN EACH SPECIFIED COUNTRY.

Place of birth.	Literates.						Illiterates.		Total.	
	Persons who read and write English.		Persons who do not read and write English, but read and write some other language.		Total.		Number.	Per cent.	Number.	Per cent.
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

Glancing at the total line for each city, we see that in the district canvassed in Baltimore, with 13,335 persons 10 years of age or over, 80.40 per cent were literate and 19.60 per cent illiterate; the literate, composing 80.40 per cent, consisted of persons who read and write English, 61.68 per cent, and persons who do not read and write English, but read and write some other language, 18.72 per cent. In Chicago, with 14,847 persons 10 years of age or over, 52.44 per cent were literate as regards English, and 22.19 per cent literate as regards some other language than English, making the total per cent of literate 74.63, as against 25.37 per cent illiterate. New York, with 21,584 persons 10 years of age or over, shows but 36.84 per cent of literate as regards English, and 16.51 per cent literate as regards some other language, a total of 53.35 per cent of literates, while 46.65 per cent were illiterate. Philadelphia, with 12,416 persons 10 years of age or over, shows 44.35 per cent literate as regards English, 18.58 per cent literate as regards some other language, a total of 62.93 per cent literate, leaving 37.07 per cent illiterate. The greatest proportion of illiterate persons, as has been shown, was found in New York, the per cent being 46.65, followed by Philadelphia with 37.07 per cent, Chicago with 25.37 per cent, and the smallest per cent of all, 19.60, having been found in Baltimore. Comparing the native and foreign born population 10 years of age or over as regards illiteracy, the summary shows that in the Baltimore district but 8.13 per cent of the native born were illiterate, while the illiterate foreign born constituted 30.62 per cent of the total foreign born population 10 years of age or over. Of the native born in Chicago 5.64 per cent were illiterate; of the foreign born, 33.86 per cent; in New York 7.20 per cent of the native born were illiterate, and 57.69 per cent of the foreign born, while in Philadelphia the illiterates were 8.44 per cent of the native and 46.61 per cent of the foreign born. The proportion of the native born persons who were illiterate, commencing with the largest, was 8.44 per cent in Philadelphia, 8.13 per cent in Baltimore, 7.20 per cent in New York, and 5.64 per cent in Chicago; and the proportion of the foreign born, 57.69 per cent in New York, 46.61 per cent in Philadelphia, 33.86 per cent in Chicago, and 30.62 per cent in Baltimore. It may be of interest to glance at the column showing the proportion of persons born in each specified country who are illiterate. Taking up first that part of the table relating to Baltimore, we see that the greatest proportion of illiterates was found among those reported as having been born in Spain and Portugal, the per cent being 66.67; Italy comes next, showing 52.48 per cent illiterates; then Poland, with 47.31 per cent; Austria-Hungary, with 36.45 per cent; China, with 33.33 per cent; Russia, with 29.70 per cent; Germany, with 27.50 per cent, etc. In Chicago the greatest proportion of illiterates, 69.86 per cent, was found among those born in Italy; those born in Poland constituted 30.20 per cent; those from Russia, 28.69 per cent, etc. In New York the countries showing the largest proportion of

illiterates were as follows: Italy, 66.84 per cent; Russia, 54.35 per cent; Poland, 50.24 per cent; Spain and Portugal, 42.86 per cent; Ireland, 39.32 per cent; and Austria-Hungary, 26.37 per cent. In Philadelphia the proportions were as follows: Italy, 63.63 per cent; Russia, 41.92 per cent; Netherlands, 40.91 per cent; Poland, 40.27 per cent; Spain and Portugal, 33.33 per cent; Austria-Hungary, 30.84 per cent; and Ireland, 25.79 per cent. Generally speaking, the largest proportion of illiterates born in foreign countries were from Italy, Poland, Russia, and Spain and Portugal. Ireland and Austria-Hungary show a rather large proportion in Baltimore, New York, and Philadelphia, but a comparatively small one in Chicago, while the German born illiterates constitute 27.50 per cent of the German born population 10 years of age or over in Baltimore, and only 14.74 per cent in Philadelphia, 12.38 per cent in Chicago, and 7.98 per cent in New York.

No information is available as to the place of birth of the illiterates of the whole population in each of the four cities. It has been possible, however, to construct a table from census returns showing the entire number of literate and illiterate persons in each of the cities, distributed as native and foreign born. In order that they may be more readily compared, the same facts as regards the illiterate population of the slum districts have been added. The table follows:

NUMBER AND PER CENT OF NATIVE AND FOREIGN BORN LITERATES AND ILLITERATES FOR THE SLUM POPULATION AND TOTAL POPULATION COMPARED.

City.	Slum population.				Total population.			
	Literates.		Illiterates.		Literates.		Illiterates.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

Total	11,516	53.35	10,068	46.65	1,117,472	92.31	93,117	7.69
PHILADELPHIA.								
Native born	2,842	91.56	262	8.44	574,706	97.82	12,795	2.18
Foreign born	4,972	53.39	4,340	46.61	230,458	88.71	29,324	11.29
Total	7,814	62.93	4,602	37.07	805,164	95.03	42,119	4.97

As will readily be seen from this table, a considerably larger proportion of illiteracy is found in the slum districts, and more noticeably among the foreign born persons residing therein. In Baltimore illit-

erates constitute 9.17 per cent of the whole native born population, 12.40 per cent of the foreign born, the per cent for both being 9.79. In the slum district of that city 8.13 per cent of the native born residents are illiterate, and 30.62 per cent of the foreign born, the per cent for both being 19.60. In Chicago illiterates constitute 0.81 per cent of the total native born population, 8.31 per cent of the foreign born, the per cent for both being 4.63. In the slum district, however, 5.64 per cent of the native born persons are illiterate, and 33.86 per cent of the foreign born, the per cent for both being 25.37. In New York, the per cent of the illiterates is 1.16 for the entire native population and 14.06 for the foreign, the per cent for both being 7.69, while for the slum population the per cent of native born persons who are illiterate is 7.20, and the per cent of foreign born 57.69, the per cent of both being 46.65. Philadelphia shows nearly as large a proportion of illiterates in the slum districts as New York. The figures for the whole population are as follows: 2.18 per cent of all native born persons are illiterate, and 11.29 per cent of foreign born, the per cent for both being 4.97. In the slum districts of that city 8.44 per cent of native born persons are illiterate, and 46.61 per cent of foreign born, the per cent for both being 37.07.

Table XXV.—School attendance, by nativity, age, kind of school, and sex, pp. 536 to 539.—This table shows the school attendance of the residents of the slum districts, classified by nativity, age, and sex, for those attending public and private schools. For Baltimore, 2,147, or 81.67 per cent, out of a total school attendance of 2,629, were native, and 482, or 18.33 per cent, foreign born. The total for Chicago was 2,811, of which 1,748, or 62.18 per cent, were native, and 1,063, or 37.82 per cent, foreign born. With an attendance of 4,340 in New York, 2,898, or 66.77 per cent, were native, and 1,442, or 33.23 per cent, foreign born, while for Philadelphia, 1,453, or 55.56 per cent, out of an attendance of 2,615, were native, and 1,162, or 44.44 per cent, foreign born.

As regards sex, the attendance in each of the four cities was pretty evenly divided, the males predominating slightly in Baltimore, Chicago, and New York, and the females in Philadelphia.

The following table classifies all scholars according to age periods:

NUMBER AND PER CENT OF SCHOLARS UNDER EACH AGE PERIOD.

Age periods.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Under 5 years	.....	.....	7	.25	25	.58	16	.61
5 to 9 years	1,201	45.68	1,197	42.58	2,313	53.29	1,356	51.85
10 to 13 years	1,166	44.35	1,183	42.08	1,613	37.16	995	38.05
14 to 19 years	259	9.85	419	14.91	384	8.85	243	9.29
20 years or over	3	.12	5	.18	3	.07	2	.08
Age not reported	.....	.....	.....	.....	2	.05	3	.12
Total	2,629	100.00	2,811	100.00	4,340	100.00	2,615	100.00

Of the 2,629 scholars reported for the Baltimore slum district, 45.68 per cent were from 5 to 9 years old, 44.35 per cent from 10 to 13 years, a very small per cent, 9.97, being over that age and none under 5. Practically the same proportions are found in the other three cities.

A short summary showing the distribution of the scholars by kind of school has been drawn from Table XXV, and appears below:

NUMBER AND PER CENT OF SCHOLARS ATTENDING PUBLIC AND PRIVATE SCHOOLS.

Kind of school.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Public	1,703	64.78	2,181	77.59	2,743	63.20	2,241	85.70
Private	926	35.22	630	22.41	1,597	36.80	374	14.30
Total	2,629	100.00	2,811	100.00	4,340	100.00	2,615	100.00

The proportion of persons in the slum districts canvassed attending public and private schools is not at all uniform in the four cities. The greatest proportion attending public schools is found in Philadelphia, the per cent being 85.70, while the smallest per cent, 63.20, was in New York.

Table XXVI.—Condition of all children from 5 to 14 years of age, inclusive, by nativity, sex, and nativity of parents, pp. 540, 541.—This table deals with the condition of children in the slum districts canvassed, showing the number of native and foreign born of each sex and parent nativity, for those reported as at home, at work, at school, and both at work and at school. The number and per cent of native and foreign born children of each condition is given below:

NUMBER AND PER CENT OF NATIVE AND FOREIGN BORN CHILDREN OF EACH CONDITION.

Nativity.	Children at home.		Children at work.		Children at school.		Children at work and at school.		Total of all children.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
BALTIMORE.										
Native born	962	30.60	132	4.20	2,049	65.17	1	.03	3,144	100.00
Foreign born	234	29.66	89	11.28	463	58.68	3	.38	789	100.00

NEW YORK.										
Native born	627	18.04	90	2.59	2,740	78.85	18	.52	3,475	100.00
Foreign born	387	18.69	323	15.59	1,325	63.98	36	1.74	2,071	100.00
Total	1,014	18.28	413	7.45	4,065	73.30	54	.97	5,546	100.00
PHILADELPHIA.										
Native born	433	23.14	57	3.05	1,374	73.44	7	.37	1,871	100.00
Foreign born	255	16.12	227	14.35	1,082	68.39	18	1.14	1,582	100.00
Total	688	19.92	284	8.23	2,456	71.13	25	.72	3,453	100.00

A glance at the totals shows that in each of the four cities the greatest proportion of children between 5 and 14 years of age were found at school, the next largest number being at home. A very small proportion, varying from 4.91 per cent in Chicago to 8.23 per cent in Philadelphia, were at work, while a still smaller proportion were reported as having been both at work and at school.

An examination of the above summary in detail will show the per cent of the native and foreign born children who are of each condition. In Baltimore, out of the 3,144 native born children between 5 and 14 years of age, 30.60 per cent were at home, 4.20 per cent at work, 65.17 per cent at school, and 0.03 per cent both at work and at school; while of the 789 foreign born 29.66 per cent were at home, 11.28 per cent at work, 58.68 per cent at school, and 0.38 per cent both at work and at school. A comparison of these per cents will show that a larger proportion of the native than of the foreign born is at home and at school, while a proportion considerably smaller is at work and both at work and at school. If comparison is made in like manner for the other cities, the same thing will be found to be true with scarcely an exception.

The following short summary shows the number and per cent of the children of each condition who are native and foreign born:

NUMBER AND PER CENT OF CHILDREN OF EACH CONDITION, NATIVE AND FOREIGN BORN.

Nativity.	Children at home.		Children at work.		Children at school.		Children at work and at school.		Total of all children.

Foreign born	255	37.06	227	79.93	1,082	44.06	18	72.00	1,582	45.82
Total	688	100.00	284	100.00	2,456	100.00	25	100.00	3,453	100.00

Of the children at home the native born form much the larger proportion in all the four cities, the per cents ranging from 61.83 in New York to 80.43 in Baltimore. Considering the children at work, we note

that in Baltimore only do the native born constitute the larger proportion, the percentages being 59.73 native and 40.27 foreign born. In each of the other three cities about three-fourths of all children at work were foreign born, while the greater proportion of children at school were native born in each of the cities. The percentages are not at all uniform, the native born constituting 81.57 per cent in Baltimore, 63.28 per cent in Chicago, 67.40 per cent in New York, and 55.94 per cent in Philadelphia. Of the children both at work and at school, forming but a very small proportion of the children between 5 and 14 years of age, the majority were foreign born, the per cent ranging from 65.88 in Chicago to 75 in Baltimore.

The following table deals with the parent nativity of the children of each class under consideration:

NUMBER AND PER CENT OF CHILDREN OF EACH PARENT NATIVITY.

A reference to that part relating to the children at work will sufficiently explain the manner of using this table. In the slum district of Baltimore, as well as in the other cities, the greatest proportion falling under this classification of the conditions of children, were of foreign

parentage. Baltimore shows 66.66 per cent of the children at work to have been of foreign parentage; Philadelphia, 91.55 per cent; Chicago, 95.79 per cent; and New York, 96.85 per cent. New York shows 1.21 per cent only of the children at work to have been of native parentage; Chicago follows with 2.63 per cent; Philadelphia with 5.28 per cent; and Baltimore with the largest proportion, 24.89 per cent. The other parent nativities are father native, mother foreign, and father foreign, mother native. The sum of these two shows the per cent of children of this class of mixed parentage. The proportions were 1.58 per cent in Chicago, 1.94 per cent in New York, 3.17 per cent in Philadelphia, and 9.05 per cent in Baltimore.

Table XXVII.—Married women having a specified number of children living, by number of children born to each, age periods, and nativity, pp. 542 to 565.—This table shows for the slum districts canvassed the number of native and foreign born married women of the specified ages who have had no children and who have had a certain number of children born to them, together with the number of these children living. In this table the term married women includes not only those who are married, but also widowed and divorced women. Single women, comprising but a very small proportion of the women who have had children, have been excluded. A number of short tables summarizing the various facts set forth in the table follow:

NUMBER AND PER CENT OF NATIVE AND FOREIGN BORN MARRIED WOMEN WHO HAVE HAD NO CHILDREN AND WHO HAVE HAD CHILDREN.

Analyzing each city separately, and beginning with Baltimore, we notice that of the total number of women classed here as married 36.42 per cent were native and 63.58 per cent foreign born. Of the married women who have had no children 52.05 per cent were native and 47.95

per cent foreign born, while of the married women who have had children 34.27 per cent were native and 65.73 per cent foreign born. Dealing in the same manner with Chicago, 19.36 per cent of all married women were native and 80.64 per cent foreign born. Of those who have had no children 34.60 per cent were native and 65.40 per cent foreign born, while of those who have had children 16.40 per cent were native and 83.60 per cent foreign born. For New York 9.48 per cent of the married women were native and 90.52 per cent foreign born. Of those who have had no children 13.64 per cent were native and 86.36 per cent foreign born while of those who have had children 8.87 per cent were native and 91.13 per cent foreign born. In Philadelphia 19.22 per cent of the married women were native and 80.78 per cent foreign born. Of those who have had no children 32.77 per cent were native and 67.23 per cent foreign born, while of those who have had children 17.23 per cent were native and 82.77 per cent foreign born.

This table shows in summarized form for the slum districts canvassed the distribution of the native and foreign born married women as to the number and per cent who have had children and the number and per cent who have had no children. The relative fecundity of native and foreign born women is clearly shown here. The figures show that of the native born married women in the slum district of Baltimore 17.30 per cent have had no children and 82.70 per cent have had children, while of the foreign born married women in the same city but 9.12 per cent have had no children and 90.88 per cent have had children. The percentages for the other cities uniformly show that the married women of foreign birth who have had children are relatively greater in number than those born in the United States.

A classification of married women who have had no children and who have had children, by age periods, follows:

NUMBER AND PER CENT OF MARRIED WOMEN WHO HAVE HAD NO CHILDREN AND WHO HAVE HAD CHILDREN, BY AGE PERIODS.

Age periods.	Married women who have had no children.		Married women who have had children.		Total married women.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

The greatest proportion of married women who have had no children in each of the four cities was between the ages of 20 and 29, those between 30 and 39 coming next in point of numbers. Married women who have had children are pretty evenly divided between the classes 20 to 29 years and 30 to 39 years, the number in the latter class slightly predominating in Baltimore and New York, while the former class is larger in Chicago and Philadelphia.

The next summary presented shows the number and per cent of native and foreign born married women who have borne each specified number of children, with percentages based on the same:

Taking up that portion of the table referring to the Baltimore slum district and looking at the first two columns of percentages, we see that of the women who have borne no children 52.05 per cent were native and 47.95 per cent foreign born; of those having borne one child 48.23 per cent were native and 51.77 per cent foreign born; of those having borne two children 41.01 per cent were native and 58.99 per cent foreign born; and so, following the column down, we see the percentage of foreign born mothers gradually increasing with hardly a break, and the percentage of native born mothers having a larger number of children correspondingly decreasing. The same conditions obtain in the other cities. The last three columns of the table show the proportion of native born, of foreign born, and of total married women who have had each a specified number of children. Of the native born married women in Baltimore 17.30 per cent have had no children, 15.93 per cent have had one child, 12.61 per cent have had two children, 11.18 per cent have had three children, 10.53 per cent have had four children, etc.; 50.25 per cent of native born married women have had from one to four, 17.30 per cent have had none, leaving 32.45 per cent who have had five or more children. On the other hand, 41.94 per cent of the foreign born married women have had from one to four children, but 9.12 per cent have had no children at all, leaving 48.94 per cent who have had five or more children. The large proportion of native born married women who have had less than five children is noticeable in the other cities, as is also the larger proportion of foreign born married women who have had five or more.

Table XXVIII.—Persons sick or physically defective, by kind of ailment or defect, nativity, and sex, pp. 566 to 573.—This table shows in brief form, for the native and foreign born of each sex, the defective physical conditions of the residents of the slum districts of the four cities involved in the investigation. The exceedingly small proportion of persons sick during the year or physically defective is worthy of notice. Out of a total of 18,048 persons reported for Baltimore but 789 of this class were found, in 455 of which cases childbirth was reported as the ailment. Excluding this ailment from consideration, but 334 persons, 1.85 per cent, out of a total of 18,048 were reported as sick or physically defective in Baltimore. Excluding this same ailment, the figures for the other cities are as follows: In Chicago, with a total of 19,748 persons reporting, 770, or 3.90 per cent, were sick or physically defective; in New York, with a total of 28,996 persons reporting, 680, or 2.35 per cent, were sick or physically defective; and in Philadelphia, with a total of 17,060 persons involved, 347, or 2.03 per cent, were so reported. The table shows the name of the ailment or defect in each instance.

Table XXIX.—Number of families and individuals, by tenements to a house and rooms to a tenement, pp. 574 to 583.—This table is the first of a number dealing with the tenements of the slum population canvassed. It shows the families, and male, female, and total population, classified according to the number of tenements to the house and the number of rooms to the tenement. For each of these classifications of families and individuals is shown also the total number of rooms in all the tenements concerned.

A recapitulation of the results of this table, by number of tenements to a house, discarding the element of rooms to a tenement, follows, the additional columns showing the average number of persons to a room and the per cent of families and individuals belonging to each number of tenements to a house:

NUMBER AND PER CENT OF FAMILIES AND INDIVIDUALS, BY TENEMENTS TO A HOUSE.

Tenements to a house.	Families.	Individuals.			Total rooms.	Average persons to a room.	Per cent of families.	Per cent of individuals.
		Male.	Female.	Total.

The 4,028 families in the Baltimore slum district canvassed, comprising 8,996 males and 9,052 females, a total of 18,048 persons, occupy 15,195 rooms, showing an average of 1.19 persons to a room. Chicago shows an average of 1.37 persons to a room, New York 1.88, and Philadelphia 1.47. The greatest number of tenements to a house varied from

13 in Baltimore to 29 in New York, Philadelphia having as high as 15, and Chicago 24. The large number of families in Baltimore, Chicago, and Philadelphia living in houses having from one to five tenements is noticeable. New York is an exception, however, showing a greater proportion of families living in houses having a larger number of tenements to the house. Philadelphia leads in this respect, showing 53.91 per cent of all families, comprising 60.97 per cent of all individuals, living in houses of one tenement, that is, occupying the whole house. Baltimore follows with 36.25 per cent of families, comprising 43.12 per cent of all individuals; Chicago, with 9.53 per cent of families, comprising 11.73 per cent of individuals, and New York, with only 1.84 per cent of families, comprising 7.69 per cent of individuals. The per cent of families and individuals living in houses having two or more tenements may be seen by reference to the recapitulation itself.

From this table may also be drawn facts relative to the number of persons to a dwelling or house. The dwelling, as defined by the census office and for census purposes, means any building or place of abode in which any person was living at the time the census was taken, whether the abode was a room above a warehouse or factory, a loft above a stable, a wigwam on the outskirts of a settlement, a hotel, a boarding or lodging house, a large tenement house, or the dwelling ordinarily considered as such. Under this definition the number of persons to a dwelling, as shown by the eleventh census of the United States for each of the four cities as a whole, was as follows: Baltimore, 6.02 persons; Chicago, 8.60 persons; New York, 18.52 persons, and Philadelphia, 5.60 persons. The figures drawn from Table XXIX, showing similar facts for the slum districts canvassed, show an invariably larger number of persons to a dwelling. The differences in Baltimore and Philadelphia are not so very great, although noticeable. In New York and Chicago, however, the number of persons to a dwelling in the slum districts is almost double that found in the whole city. The figures for the slum districts are as follows: Baltimore, 7.71; Chicago, 15.51; New York, 36.79, and Philadelphia, 7.34 persons to a dwelling.

Another recapitulation follows, showing the same facts as the preceding one, by rooms to a tenement.

NUMBER AND PER CENT OF FAMILIES AND INDIVIDUALS, BY ROOMS TO A TENEMENT.

Rooms to a tenement.	Families.	Individuals.			Total rooms.	Average persons to a room.	Per cent of families.	Per cent of individuals.

The number of families having each specified number of rooms is here shown, together with the number of male, female, and total persons comprised in these families. The total number of rooms is also given, and is usually the product of the number of families multiplied by the number of rooms to a tenement. In a few cases, however, two families were found living in one tenement, and in such instances the total rooms will be slightly smaller than would be found in the manner stated above. The number of rooms is followed by a column showing the average persons to a room, and two columns, indicating the percentages of families and of individuals living in each specified number of rooms. Taking up the table we find that in Baltimore 530 families, or 13.16 per cent of all families, live in tenements of one room, with an average of 3.15 persons to a room. In Chicago 5.87 per cent of all families live in one room, the average persons being 2.74. The per cent of families living in one room in New York is 5.62 and in Philadelphia, 12.10, with an average number of persons to the room of 3.13 and 3.11, respectively. The per cent of families living in two rooms in each of the four cities is shown to be as follows: Baltimore, 27.88 per cent; Chicago, 19.14 per cent; New York, 44.55 per cent, and Philadelphia, 19.41 per cent. The average persons to a room in these families are in Baltimore 1.92 persons; Chicago, 1.93; New York, 2.14; and Philadelphia, 1.99. The comparative number of families living in tenements of three and four rooms is also large, the number living in tenements of over four rooms comprising but a small per cent of all families. The families living in one room are naturally more crowded; those in two, three, and four rooms following in order.

Table XXX.—Families and individuals living in owned and in rented tenements compared, by tenements to a house and rooms to a tenement, pp. 584 to 594.—In Table XXX a comparison is made between those of the slum population who live in property which they lease or rent and

those who own the tenement in which they live. The number and per cent of families and individuals falling under each class is given, subdivided as to the number of tenements to the house and rooms to the tenement. For example, taking that portion of the table which refers to the results for the Baltimore district, we see that a total of 12 families, composed of 26 individuals, live in tenements of one room and in houses of but one tenement. Of these 12 families but one family owns the tenement in which it lives, while 11 rent. The per cent of families living in rented tenements is therefore 91.67. The number of individuals composing the 12 families, as before stated, is 26, of whom 1 owns the tenement in which he lives, the remaining 25, or 96.15 per cent, living in rented tenements. The facts for the remainder of the table may be used in a similar way. A short table, summarizing the results of Table XXX by the number of tenements to the house and excluding the element of rooms to the tenement, follows:

FAMILIES AND INDIVIDUALS LIVING IN OWNED AND IN RENTED TENEMENTS COMPARED, BY TENEMENTS TO A HOUSE.

Tenements to a house.	Families—			Per cent of families living in—		Individuals—			Per cent of individuals living in—	
	Living in owned tenements.	Living in rented tenements.	Total.	Owned tenements.	Rented tenements.	Living in owned tenements.	Living in rented tenements.	Total.	Owned tenements.	Rented tenements.

In Baltimore it is shown that but 19.56 per cent of the families involved own the tenements in which they live, and yet this is a larger proportion than was found in any of the other cities, the per cent for Chicago being 10.23; that of Philadelphia, 7.55; and that of New York only 0.85 per cent. The proportion of individuals living in tenements owned by some member of the family is practically the same as that for families. A very large proportion of families living in houses owned by some member of the family are seen to live in houses having one, two, or three tenements to a house, in each of the four cities. The facts for those living in rented tenements are different, and are not uniform for the four cities. In Baltimore and Philadelphia most of the families renting live in houses having one to five tenements to the house, those in Chicago in houses having one to eight, while the figures for New York indicate that a very large proportion of the families renting live

in houses having as many as 15 and even 20 tenements under the same roof.

Excluding the element of tenements to a house and summarizing the families and individuals in their own and rented houses by the number of rooms to a tenement, we have the following table:

FAMILIES AND INDIVIDUALS LIVING IN OWNED AND IN RENTED TENEMENTS COMPARED, BY ROOMS TO A TENEMENT.

Rooms to a tenement.	Families—			Per cent of families living in—		Individuals—			Per cent of individuals living in—	
	Living in owned tenements.	Living in rented tenements.	Total.	Owned tenements.	Rented tenements.	Living in owned tenements.	Living in rented tenements.	Total.	Owned tenements.	Rented tenements.

Of the families owning the tenements in which they live, the greatest number live in tenements composed of four, five, and six rooms. In Baltimore, with 788 families living in owned tenements, 85 live in tenements of four rooms, 100 in tenements of five rooms, 164 in tenements of six rooms, 123 in tenements of seven rooms, and 81 in tenements of eight rooms. In Chicago, with 397 families living in owned tenements, 61 live in tenements of three rooms, 122 in tenements of four rooms, 60 in tenements of five rooms, and 78 in tenements of six rooms. In New York, with 50 families living in owned tenements, 16 live in tenements of four rooms, 7 in tenements of five rooms, and 7 in tenements of six rooms. In Philadelphia, with 250 families living in owned tenements, 31 live in tenements of four rooms, 20 in tenements of five rooms, 47 in tenements of six rooms, and 44 in tenements of seven rooms. The number of rooms to a tenement in tenements rented by families living in them is invariably smaller than for families owning the tenement in which they live. In Baltimore almost a third of all the families rent-

ing live in tenements of two rooms, with an average of nearly four persons to the family, or two persons to the room; in Chicago more than one-half live in tenements of three and four rooms, with an average respectively of 4.68 and 5.45 persons to the family; in New York over three-fourths live in tenements of two and three rooms, with an average respectively of 4.16 and 5.06 persons to the family; and in Philadelphia about eight-tenths of families renting live in tenements of one, two, three, and four rooms, the largest number living in tenements of three rooms, and having an average of 5.34 persons to the family.

Table XXXI.—Weekly rent paid per tenement, by rooms to the tenement, pp. 595 to 600.—Table XXXI shows in detail the weekly rents paid by families living in the various specified number of rooms. To avoid an unnecessary lengthening of the table the amounts paid for rent have been classified to some extent, being given at the nearest multiple of 5 cents. A small number of persons owning the tenement in which they live are of course excluded here. In order to bring the figures within still smaller compass, making them more convenient for comparison, the following summary is given:

NUMBER AND PER CENT OF TENEMENTS UNDER EACH CLASSIFICATION OF WEEKLY RENT PAID.

Weekly rent paid.	Baltimore.		Chicago.		New York.		Philadelphia.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Under $1.00	1,170	35.99	87	2.44	84	1.50	298	9.86
$1.00 or under $2.00	1,342	41.28	1,247	34.91	2,036	36.47	1,123	37.17
2.00 or under 3.00	336	10.34	1,151	32.22	1,775	31.80	639	21.15
3.00 or under 4.00	171	5.26	428	11.98	994	17.81	308	10.20
4.00 or under 5.00	68	2.09	120	3.36	182	3.26	97	3.21
5.00 or under 6.00	37	1.14	67	1.88	97	1.74	86	2.85
6.00 or under 7.00	18	.55	29	.81	57	1.02	34	1.13
7.00 or under 8.00	1	.03	21	.59	10	.18	8	.26
8.00 or under 9.00	14	.43	15	.42	7	.13	11	.36
9.00 or under 10.00	3	.09	6	.17	8	.14	5	.17
10.00 or over	5	.15	89	2.49	28	.50	9	.30
Not specified	86	2.65	312	8.73	304	5.45	403	13.34
Total	3,251	100.00	3,572	100.00	5,582	100.00	3,021	100.00

In all four cities the families paying $1.00 or under $2.00 per week for rent form the largest group, constituting 41.28 per cent of total families in Baltimore, 34.91 per cent in Chicago, 36.47 per cent in New York, and 37.17 per cent in Philadelphia. Baltimore differs from the other cities in having quite a large proportion of families paying under $1.00 per week for rent, the per cent being 35.99.

Table XXXII.—Sanitary condition of tenements, p. 601.—This table shows the inside and outside condition of the tenements of the population of the districts canvassed. The light and air, ventilation, cleanliness, and outside sanitary condition are each classified as being excellent, good, fair, or bad. The table shows the number of tenements falling under each class. In Baltimore we notice that the greatest number of tenements fall under the classification of good as regards outside condition, light and air, ventilation, and cleanliness. Those classed as fair form the next greatest number, and quite

a number are classed as bad. In Chicago the greatest proportion are fair only, the next greatest number falling under good, except as regards outside sanitary condition, which was reported bad in the greatest number of cases. In New York the greatest number of tenements are classed as fair as regards outside sanitary condition, and good as regards light and air, ventilation, and cleanliness. In Philadelphia we find the largest proportion of tenements, as in Baltimore, reported as good as regards the sanitary condition. The very small proportion classed as excellent in the four cities is noticeable.

In this connection a series of short summaries relating to bath rooms, water closets or privies, and yards is presented. We take up first the summary relating to bath rooms, which shows for each city the number and per cent of families and individuals who have and who have not a bath room in the house or tenement they occupy.

NUMBER AND PER CENT OF FAMILIES AND INDIVIDUALS IN HOUSES OR TENEMENTS HAVING AND NOT HAVING BATH ROOMS.

City.	Population of houses or tenements having bath rooms.				Population of houses or tenements not having bath rooms.			
	Number.		Per cent.		Number.		Per cent.	
	Families.	Individuals.	Families.	Individuals.	Families.	Individuals.	Families.	Individuals.
Baltimore	296	1,663	7.35	9.21	3,732	16,385	92.65	90.79
Chicago	110	748	2.83	3.79	3,771	19,000	97.17	96.21
New York	138	1,888	2.33	6.51	5,774	27,108	97.67	93.49
Philadelphia	560	3,080	16.90	18.05	2,753	13,980	83.10	81.95

The summary shows that in the Baltimore district but 7.35 per cent of all families, comprising but 9.21 per cent of the total population, have bath rooms, the per cent of families and individuals not having bath rooms being, respectively, 92.65 per cent and 90.79 per cent. The condition of the Chicago district is even worse, but 2.83 per cent of all families, comprising 3.79 per cent of all persons, having bath rooms. Worst of all is New York, with but 2.33 per cent of families having bath rooms. Philadelphia shows a greater proportion of families having bath rooms than any of the other cities, the per cent being 16.90.

The next table shows for each city the number and per cent of families and individuals having water closets or privies with the houses or tenements in which they live.

NUMBER AND PER CENT OF FAMILIES AND INDIVIDUALS IN HOUSES OR TENEMENTS HAVING WATER CLOSETS OR PRIVIES.

City.	Population of houses or tenements having water closets.				Population of houses or tenements having privies.			
	Number.		Per cent.		Number.		Per cent.	
	Families.	Individuals.	Families.	Individuals.	Families.	Individuals.	Families.	Individuals.
Baltimore	486	2,637	12.07	14.61	3,542	15,411	87.93	85.39
Chicago	1,027	5,492	26.46	27.81	2,854	14,256	73.54	72.19
New York	2,797	14,716	47.31	50.75	3,115	14,280	52.69	49.25
Philadelphia	1,006	5,473	30.37	32.08	2,307	11,587	69.63	67.92

In the Baltimore district 87.93 per cent of the families have privies, and but 12.07 per cent water closets, the smallest per cent found in any of the cities. Chicago shows 73.54 per cent having privies, and 26.46 per cent water closets. Philadelphia comes next, showing 69.63 per cent of the families having privies and 30.37 per cent water closets. In New York the per cent of families having privies is smaller than in any of the other cities, being 52.69 per cent, while 47.31 per cent have water closets.

An additional investigation, comprehending 480 houses in the New York and 378 in the Philadelphia slum districts canvassed, was made in order to ascertain how many persons in each house were compelled to use the same bath rooms, water closets, and privies. Out of a total of 480 houses visited for this purpose in New York, but 17 had bath rooms, while in Philadelphia, out of a total of 378 houses visited, but 67 had bath rooms. The average persons to a bath room in the houses having bath rooms were 8.14 in New York and 7.42 in Philadelphia. The table itself shows the details for each specified number of persons to a bath room in each house. It should be borne in mind that these figures refer only to the houses having bath rooms, 96.67 per cent of the houses investigated in New York and 82.28 per cent in Philadelphia being entirely without such accommodations. The average number of persons compelled to use the same water closet or privy was 10.52 persons in New York and 6.86 persons in Philadelphia. These averages, although for but a small portion of the slum districts of the two cities, are thought to be fairly representative of the whole. The table relating to bath rooms follows:

NUMBER OF PERSONS TO A BATH ROOM.

Persons to a bath room.	Houses.	
	New York.	Philadelphia.
1 or under 2	.....	2
2 or under 3	.....	2
3 or under 4	2	8
4 or under 5	3	4
5 or under 6	2	4

Total houses	480	378

The next table relates to yards, and shows for the slum district canvassed in each city the number and per cent of families and individuals having and not having yards with the house or tenement in which they live.

NUMBER AND PER CENT OF FAMILIES AND INDIVIDUALS IN HOUSES OR TENEMENTS HAVING AND NOT HAVING YARDS.

City.	Population of houses or tenements having yards.				Population of houses or tenements not having yards.			
	Number.		Per cent.		Number.		Per cent.	
	Families.	Individuals.	Families.	Individuals.	Families.	Individuals.	Families.	Individuals.
Baltimore	3,394	15,381	84.26	85.22	634	2,667	15.74	14.78
Chicago	2,696	13,364	69.47	67.67	1,185	6,384	30.53	32.33
New York	4,993	23,404	84.46	80.71	919	5,592	15.54	19.29
Philadelphia	2,967	15,361	89.56	90.04	346	1,699	10.44	9.96

This table shows the greatest proportion of families having yards in Philadelphia, the per cent being 89.56. In New York and Baltimore slightly more than 84 per cent had yards, while in Chicago but 69.47 per cent of the families involved in the investigation had yards.

In order to find out the sanitary condition of the atmosphere in the tenements covered by the investigation, Dr. Alfred S. Houghton, a

physician, bacteriologist, and chemist, was employed to make a chemical and biological investigation. Two examinations were made covering 311 tenements in New York city and 131 in Philadelphia. The first was made in April, 1893, and, in order to compare winter conditions, a second was made in February and March, 1894. The territory covered by this investigation in New York city was the districts bounded by Mulberry, Park, Centre, North, and Bayard streets, and by Houston, Mulberry, Prince, and Mott streets; and in Philadelphia the district bounded by Passayunk avenue, Christian, South Seventh, Catherine, South Sixth, and Fitzwater streets.

Dr. Houghton's first report was as follows:

"The results of this investigation while not conclusive, owing to the season of the year at which they were obtained, nevertheless afford considerable information. In all, 442 tenements were visited, and in all but 48 of these the percentage of carbon dioxide was less than 0.0007 (Walpert's apparatus); of these in 23 instances the percentage was 0.001 and in 3 instances it was 0.002. In 152 instances the percentage of moisture in the air was over 60 per cent and in 290 instances 60 per cent or under. In 433 instances the temperature of the air was over 60° and in 9 instances 60° or under.

"It was found impracticable to make a biological examination of the air in every tenement visited, but 85 such examinations were made, including 4 theatres. In New York city 74 examinations were made and in Philadelphia 11. In New York of the 74 plates exposed, 18 developed nothing at all and 15 nothing but moulds. In Philadelphia of the 11 plates exposed, 1 developed nothing at all and 2 nothing but moulds. In New York city pathogenic bacteria were found in only 4 instances, one of which was the Grand Opera House and one the ophthalmic ward of the hospital connected with the Industrial Home for Children at 155 Worth street. In Philadelphia pathogenic bacteria were found in 3 instances.

"The following are the pathogenic bacteria found, with the location, in the order of their frequency:

Staphylococcus pyogenes aureus,

New York, Grand Opera House.
Philadelphia, 808 Passayunk avenue.
Philadelphia, 621 Wall street.

Staphylococcus pyogenes albus,

New York, 57 Baxter street (rear).
Philadelphia, 802 South Sixth street.

Staphylococcus pyogenes citreus,

New York, 155 Worth street (hospital).

Staphylococcus pyogenes salivarius,

New York, 155 Worth street (hospital).

Streptococcus septicus liquefaciens,

New York, 148 Leonard street.

"The following are the non-pathogenic bacteria found, with the location, in the order of their frequency:

Micrococcus cereus albus,

New York, 46 Baxter street.
New York, 293 Mott street.
New York, 293 Mott street (rear).
New York, 281 Mott street.
New York, 277 Mott street.
New York, 284 Mulberry street.
New York, 280 Mulberry street.
New York, 280 Mulberry street (rear).
New York, Madison Square Theatre.
Philadelphia, 802 South Sixth street.
Philadelphia, 10 Strauss court.
Philadelphia, 808 Passayunk avenue.
Philadelphia, 1 Colls avenue.
Philadelphia, 621 Wall street.
Philadelphia, 625 Wall street.
Philadelphia, 785 South Sixth street.

Micrococcus albus liquefaciens,

New York, 49 Baxter street.
New York, 293 Mott street.
New York, 291 Mott street.
New York, 281 Mott street.
New York, 283 Mott street.
New York, 273 Mott street.
New York, 280 Mulberry street.
New York, 280 Mulberry street (rear).
Philadelphia, 802 South Sixth street.
Philadelphia, 1 Colls avenue.
Philadelphia, 625 Wall street.

Micrococcus cereus flavus,

New York, 46 Baxter street.
New York, 293 Mott street.
New York, 293 Mott street (rear).
New York, 280 Mulberry street.
New York, Madison Square Theatre.
Philadelphia, 802 South Sixth street.
Philadelphia, 1 Colls avenue.
Philadelphia, 621 Wall street.
Philadelphia, 625 Wall street.

Micrococcus flavus liquefaciens,

New York, People's Theatre.
New York, 46 Baxter street.
New York, 46 Baxter street (rear).
New York, 291 Mott street.
New York, 283 Mott street.
New York, 280 Mulberry street.
Philadelphia, 808 Passayunk avenue.

Micrococcus candicans,

New York, Casino, Broadway and Thirty-ninth street.
Philadelphia, 10 Strauss court.
Philadelphia, 625 Wall street.

Micrococcus cremoides,

New York, 43 Baxter street,
New York, 88 Park street.
New York, 155 Worth street (school).

Micrococcus fervidosus,

New York, 37 Baxter street.
New York, 42 Baxter street.
New York, 280 Mulberry street.

Saccharomyces rosaceus,

New York, 35 Baxter street.
New York, 155 Worth street (school).
Philadelphia, 10 Strauss court.

Bacillus mycoides,
New York, 291 Mott street.
New York, 283 Mott street.

Diplococcus citreus liquefaciens,
New York, 51 East Houston street.
Philadelphia, 10 Strauss court.

Micrococcus aurantiacus,
New York, 43 Baxter street.
New York, People's Theatre.

Micrococcus radiatus,
New York, 84 Center street.
New York, Madison Square Theatre.

Micrococcus urea,
New York, 5 Mott street.
New York, 97 Bayard street.

Sarcina luteus,
Philadelphia, 10 Strauss court.
Philadelphia, 625 Wall street.

Staphylococcus virides flavescens,
New York, 282 Mulberry street.
New York, 280 Mulberry street.

Bacillus buccalis fortuitus,
New York, 277 Mott street.

Bacillus epidermidis,
New York, 5 Mott street.

Bacillus fluorescens liquefaciens,
New York, 61 Baxter street.

Bacillus fluorescens putidus,
New York, 88 Park street.

Bacillus lacticus,
New York, 37 Mott street.

Bacillus ochraceus,
New York, Madison Square Theatre.

Bacillus prodigiosus,
Philadelphia, 802 South Sixth street.

Bacillus viscosus,
New York, 31 Baxter street.

Diplococcus roseus,
Philadelphia, 10 Strauss court.

Micrococcus cinnabareus,
New York, 42 Baxter street.

Micrococcus cumulatus tenuis,
New York, People's Theatre.

Micrococcus luteus,
Philadelphia, 808 Passayunk avenue.

Oidium lactis,
New York, 280 Mulberry street.

"With the exception of the staphylococcus pyogenes these bacteria are perfectly harmless to the human family; in fact it may be stated

that they are useful factors in society. The almost complete absence of pathogenic germs in the air of the slums is astonishing. In some places there were great quantities of the same bacterium and some were almost always found associated. The moulds were not taken account of as they are unimportant. A few plates that had colonies of bacteria were ruined by rapidly growing moulds. The greater variety of bacteria was found in Philadelphia, which can be easily accounted for. In the slums of that city a system of open drains runs through each alley to the street, and from this source the decaying matter when dried is wafted into the adjacent houses and there deposited to be stirred up by the slightest breeze.

"The extraordinary freedom from sickness in the slums of New York reflects great credit on the health board of that city. In 311 tenements visited in that city not a single adult sick in bed was seen, except where the sickness was due to an increase in the population; and very few children. Of what village of the same population can such a statement be made?

"The worst air encountered was in the People's Theatre, on the Bowery, where the percentage of carbon dioxide was 0.002, the temperature 80°, and the humidity 65 per cent. Among the worst places found in New York special mention should be made of 47 Baxter street (rear), where the percentage of carbon dioxide was 0.002, temperature 62°, and humidity 65 per cent. Here 6 persons were living in one room 16 by 14 by 8 feet, or less than 300 cubic feet of air to each person. At 49 Baxter street, also, where the percentage of carbon dioxide was 0.001, the temperture 60°, and humidity 64 per cent, 7 persons lived in one room 18 by 20 by 8 feet, or about 400 cubic feet of air to each person. At 5 Mott street a most disgusting condition was found in the hallway, and the air was found to contain 0.002 per cent of carbon dioxide. At 59 Baxter street 7 persons lived in two rooms 12 by 10 by 8 feet and 12 by 7 by 8 feet, or 1,632 cubic feet of air, less than 250 cubic feet to each person. At 57 Baxter street (rear), in spite of the fact that the windows were wide open, 0.001 per cent of carbon dioxide was found in the air, and the stench was indescribable. Here 5 persons lived in two rooms 14 by 12 by 8 feet and 14 by 6 by 8 feet, or 2,016 cubic feet of air, about 400 cubic feet for each person. Here a pathogenic bacterium was found in the air, i. e., the staphylococcus pyogenes albus. At 46 Baxter street (rear) the conditions were very bad. At 293 Mott street, 291 Mott street, 277 Mott street, 273 Mott street, 55 Mulberry street, 55½ Mulberry street, and 63 Mulberry street the air was found to contain 0.001 per cent of carbon dioxide, but no pathogenic germs."

A later examination, made in the winter, resulted in the following report:

"It was thought that when the windows and doors of the tenements were closed the air would be found to be contaminated to a much

greater extent than in the summer. It was found, however, that while the percentage of carbon dioxide in many instances was greater, owing to smoke from open fires, the low temperature operated to reduce the bacteria in the air to almost nothing.

"The absence of carpets, upholstered furniture, and curtains, which hold bacteria in the homes of the well-to-do, accounts for the small percentage of bacteria in the air of the slums. The people in the tenements visited were compelled to get along with the least amount of heat, only enough to cook with, hence the temperature was very low.

"Every place which had formerly been examined was visited and some observations were made in private houses and in one theater.

"Without any exception it was found that the air in the tenement houses was as pure as in any residence visited, but the air of theaters was not only overcharged with carbon dioxide, but was also of a higher temperature, more loaded with moisture, and contained pathogenic bacteria.

"In all 107 observations were made. In 85 only a trace of carbon dioxide was found in the air; in 15 the percentage was 0.001, and in 7 instances it was 0.002.

"The temperature in 1 instance was 90°, in 8 instances between 70° and 80°, in 4 instances between 60° and 70°, in 82 instances between 50° and 60°, and in 12 instances between 40° and 50°.

"The humidity in 95 instances was under 50 per cent and in 12 instances above 50 per cent of saturation.

"Pathogenic bacteria were found in only one instance, at Harrigan's Theater."

Table XXXIII.—Occupants of sleeping rooms and cubic feet of air space per individual, by number of outside windows and occupants to a room, pp. 602 to 613.—This table shows the population of the slum districts classified as to the number of occupants and outside windows in their sleeping rooms. The persons falling under each class are still further classified as regards the number of cubic feet of air space to each person, beginning with those having under 200 cubic feet, thence proceeding upward by hundreds until those having 2,000 or over are reached. For a small proportion, the cubic feet of air space was not reported. At the end of the statement for each city is given a total by the number of occupants of the rooms. As regards the number of outside windows, a very small proportion in Baltimore and Philadelphia are reported as having none in their sleeping rooms, the number being respectively 25 and 49. In Chicago 811 are so reported, while in New York 6,576 out of a total of 28,050 are reported as sleeping in rooms without an outside window. The great mass of the remaining people in the four cities sleep in rooms with 1 and 2 outside windows; a small proportion in rooms having a larger number.

An examination of the total by occupants, found at the end of the statement for each city, shows that two occupants were most frequent

in all cities. Three and four occupants to a sleeping room come next in order, with quite a large proportion of rooms with one and five occupants at night.

As regards the number of cubic feet of air space per individual in sleeping rooms, the greatest proportion of persons in the slum district in Baltimore were found to have 300 or under 400 feet, 400 or under 500 feet, 500 or under 600 feet, 200 or under 300 feet, and 700 or under 800 feet, in the order named. In Chicago and New York the largest proportion had 200 or under 300 feet, under 200 feet, 300 or under 400 feet, 400 or under 500 feet, and 500 or under 600 feet, in the order named. In Philadelphia the greatest proportion were found in the following order: 300 or under 400 feet, 400 or under 500 feet, 500 or under 600 feet, 200 or under 300 feet, and 600 or under 700 feet.

The following extract from the annual report of the health department of the city of New York for 1891 would seem to indicate the number of cubic feet of air space per individual deemed necessary by that office:

Strenuous efforts have been made to prevent the overcrowding of tenement houses. Night inspections have been constantly made, and where the number of occupants of apartments has been found too great to give each adult 400 cubic feet and each child 200 cubic feet of air space, an order has been issued to reduce the number of occupants. This order has been enforced whenever it has been found that the family were taking boarders or lodgers, but discretion has been used when it was found that only the family proper occupied the apartments, and then if it was ascertained that the income of the family warranted their seeking more commodious quarters, they were urged to do so.

During the year orders were issued to reduce the number of occupants in 1,704 cases, covering 3,307 persons. Reinspections are, of course, made to see that the orders are obeyed.

It is universally conceded that 600 cubic feet of air space per individual are desirable for adult persons, but in actual practice 400 are considered absolutely necessary.

number and per cent of persons of each, by sex 31
number and per cent of persons of each, by sex and nativity 33
number and per cent of persons of each, by sex and nativity, for the whole population of each city investigated 34
number and per cent of persons of each, by sex, for the whole population of each city investigated 32

D.

Days and hours of labor and weekly earnings, by occupation and sex (Table XVII) 55-64, 212-459
Definition of—
dwelling 86
family 42
illiteracy 50
illiterates 70
slums of cities 13
Districts in New York and Philadelphia, embraced in the investigation of the sanitary condition of the atmosphere 97
Districts, slum, boundaries of, canvassed in—
Baltimore 23
Chicago 23
New York 23, 24
Philadelphia 24
Dwelling, average number of persons to each, in each city investigated and in the slum districts canvassed 19
Dwelling, definition of 86

E.

Earnings—
average weekly, of persons engaged in remunerative occupations 56-59
classified weekly, by sex and occupation (Table XVIII) 64, 65, 460-501
classified weekly, number and per cent of persons under, by sex 65
of residents of slum districts canvassed as compared with those of working people in general 19
weekly, and days and hours of labor, by occupation and sex (Table XVII) 55-64, 212-459

F.

Families—
average size of, for the total and slum population compared 44
number and size of, by kind of family (Table III) 42-44, 118, 119
number and size of, for the whole population of each city investigated 43
preponderating, for the total and slum populations compared 44
Families and individuals living in owned and in rented tenements compared—
by rooms to a tenement 91, 92
by tenements to a house 89, 90
by tenements to a house and rooms to a tenement (Table XXX) 88-93, 584-594
Families and individuals, number and per cent of—
by rooms to a tenement 87, 88
by tenements to a house 84, 85
in houses or tenements having and not having bath rooms 94
in houses or tenements having and not having yards 96
in houses or tenements having privies 94
in houses or tenements having water closets 94

Individuals and families, number of, by tenements to a house and rooms to a tenement (Table XXIX) 84-88, 574-583
Introduction 9-19
Investigation regarding bath rooms, water closets, and privies in New York and Philadelphia slums 95, 98

L.

Law authorizing investigation of slums of cities 11
Liquor saloons, ratio of, to population in slum districts canvassed and in the cities at large 14
Literates and illiterates—
born in the United States and in specified foreign countries, number and per cent of 71, 72
by selected places of birth and sex (Table XXIV) 71-75, 534, 535
native and foreign born, number and per cent of, for total and slum population compared 74

M.

Married women—
consideration of the term 79
having a specified number of children living, by number of children born to each, age periods, and nativity (Table XXVII) 79-83, 542-565
native and foreign born, who have had and who have not had children, number and per cent of 79
who have borne a specified number of children, number and per cent of 82, 83
who have had and who have not had children, number and per cent of, by age periods 81
who have had and who have not had children, number and per cent of, by nativity 80

N.

Native and foreign born—
children, number and per cent of, who are at home 76
children, number and per cent of, who are at school 76
children, number and per cent of, who are at work 76
children, number and per cent of, who are at work and at school 76
married women who have had and who have not had children, number and per cent of 79
number and per cent of children at home, who are 77
number and per cent of children at school, who are 77
number and per cent of children at work and at school, who are 77
number and per cent of children at work, who are 77
population, by color or race, number and per cent of 28
population, by color or race, number and per cent of, for the whole population of each city investigated 29
population, consideration of 18
Native born illiterates, by sex and parent nativity 514
Nativity—
classified parent, number and per cent of persons by 44
color or race by, with sex, conjugal condition, and age periods (Table I) 25-37, 104-113
condition of all children from 5 to 14 years of age, inclusive, by, with sex and nativity of parents (Table XXVI) 76-79, 540, 541
illiterates by, with sex and parent nativity (Table XXI) 70, 514
married women having a specified number of children living by, with number of children born to each and age periods (Table XXVII) 79-83, 542-565
of parents (Table IV) 44, 45, 120
of parents, condition of all children from 5 to 14 years of age, inclusive, by, with sex and nativity (Table XXVI) 76-79, 540, 541
parent, number and per cent of children by 78, 79
parent, total and slum population compared as to 45
persons sick or physically defective by, with kind of ailment or defect and sex (Table XXVIII) 84, 566-573
school attendance by, with age, kind of school, and sex (Table XXV) 75, 76, 536-539
total and slum population compared as to 30
Nativity and sex—
number and per cent of persons of each conjugal condition by 33
number and per cent of persons of each conjugal condition by, for the whole population of each city investigated 34
number and per cent of persons under specified age periods by 35
number and per cent of persons under specified age periods by, for the whole population of each city investigated 36, 37
relationship to head of family by (Table V) 45, 46, 121-125
New York, boundaries of slum districts canvassed in 23, 24
Number and size of families, by kind of family (Table III) 42-44, 118, 119
Number of families and individuals, by tenements to a house and rooms to a tenement (Table XXIX) 84-88, 574-583

O.

Occupants of sleeping rooms and cubic feet of air space per individual, by number of outside windows and occupants to a room (Table XXXIII) 101, 102, 602-613
Occupation and sex, classified weekly earnings by (Table XVIII) 64, 65, 460-501
Occupation and sex, weekly earnings and days and hours of labor by (Table XVII) 55-64, 212-459
Occupation, sex, and age periods, illiterates by (Table XXII) 70, 515-529
Occupations—
aliens by, with selected places of birth (Table IX) 49, 130-147
by sex and selected places of birth (Table XVI) 51-55, 164-211
general industrial groups of 51, 52
of residents of slum districts 19
remunerative, average weekly earnings of persons engaged in 56-59, 64
remunerative, hours of labor per week of persons engaged in 60-64
specified groups of, number and per cent of aliens in 49
specified groups of, number and per cent of persons in 52, 53
specified groups of, per cent of persons in, by selected places of birth 53-55

Page.

Owned and rented tenements, families and individuals living in, compared, by tenements to a house and rooms to a tenement (Table XXX) 88-93, 584-594

P.

Parent nativity, illiterates by, with sex and nativity (Table XXI) 70, 514
Parents, nativity of (Table IV) 44, 45, 120
Parents, nativity of, number and per cent of children by 78, 79
Persons illiterate as regards English, but literate as regards some other language, by selected places of birth, age periods, and sex (Table XXIII) 70, 71, 530-533
Persons sick or physically defective, by kind of ailment or defect, nativity, and sex (Table XXVIII) 84, 566-573
Persons unemployed, by months unemployed, sex, and age periods (Table XIX) 65, 66, 502-505
Philadelphia, boundaries of slum districts canvassed in 24
Physically defective or sick persons, by kind of ailment or defect, nativity, and sex (Table XXVIII) 84, 566-573
Population—
of slum districts canvassed 12, 24
per cent of total and slum, born in specified foreign countries, compared 41, 42
per cent of total and slum, born in the United States, compared 41
total and slum, compared as to parent nativity 45
Private schools, attendance of, by age, sex, and nativity 536-539
Privies, number and per cent of families and individuals having 94
Privies, water closets, and bath rooms in New York and Philadelphia slums, investigation regarding 95, 96
Public schools, attendance of, by age, sex, and nativity 536-539

R.

Race. (*See* Color.)
Relationship to head of family, by nativity and sex (Table V) 45, 46, 121-125
Rent, weekly, paid per tenement, by rooms to the tenement (Table XXXI) 93, 595-600
Rented and owned tenements, families and individuals living in, compared, by tenements to a house and rooms to a tenement (Table XXX) 88-93, 584-594
Rents, classified weekly, number and per cent of tenements by 93
Results, general, of the investigation 14-19
Rooms to a tenement and tenements to a house, families and individuals living in owned and rented tenements compared by (Table XXX) 88-93, 584-594
Rooms to a tenement and tenements to a house, number of families and individuals by (Table XXIX) 84-88, 574-583
Rooms to a tenement, number and per cent of families and individuals by 87, 88
Rooms to a tenement, weekly rent paid per tenement by (Table XXXI) 93, 595-600

S.

Saloons, liquor, ratio of, to population in slum districts canvassed and in the cities at large 14
Sanitary condition of tenements (Table XXXII) 93-101, 601
Sanitary condition of the atmosphere, districts embraced in the investigation of, in New York and Philadelphia 97
Sanitary condition of the atmosphere in tenements of New York and Philadelphia, reports concerning 97-101
Scholars, number and per cent of, attending public and private schools 76
Scholars, number and per cent of, by specified age periods 75, 76
School attendance, by nativity, age, kind of school, and sex (Table XXV) 75, 76, 536-539
Schools—
attendance of public and private, by age, sex, and nativity 536-539
private, attendance of, by age, sex, and nativity 536-539
public and private, number and per cent of scholars attending 76
public, attendance of, by age, sex, and nativity 536-539
Selected places of birth—
aliens by, with age periods (Table VIII) 48, 128, 129
aliens by, with occupations (Table IX) 49, 130-147
by age periods and sex (Table II) 37-42, 114-117
illiterate aliens and illiterate foreign born males 21 years of age or over by (Table XV) 51, 162, 163
illiterate aliens and total aliens compared by (Table XIV) 51, 160, 161
illiterate aliens by, with degree of illiteracy and age periods (Table XIII) 50, 156-159
illiterates by, with degree of illiteracy, age periods, and sex (Table XX) 66-70, 506-513
occupations by, with sex (Table XVI) 51-55, 164-211
persons illiterate as regards English, but literate as regards some other language, by, with age periods and sex (Table XXIII) 70, 71, 530-533
years in the United States of aliens by (Table XI) 49, 50, 150-153
years in the United States of foreign born males 21 years of age or over by (Table X) 49, 148-151
Sex—
classified weekly earnings by, with occupation (Table XVIII) 64, 65, 460-501
color or race by, with nativity, conjugal condition, and age periods (Table I) 25-37, 104-113
comparison of, of total and slum population 17, 18
condition of all children from 5 to 14 years of age, inclusive, by, with nativity and nativity of parents (Table XXVI) 76-79, 540, 541
illiterates and literates by, with selected places of birth (Table XXIV) 71-75, 534, 535
illiterates by, with degree of illiteracy, selected places of birth, and age periods (Table XX) 66-70, 506-513
illiterates by, with nativity and parent nativity (Table XXI) 70, 514
illiterates by, with occupation and age periods (Table XXII) 70, 515-529
number and per cent of persons of each, by color or race 27
number and per cent of persons of each conjugal condition by 31
number and per cent of persons of each conjugal condition by, for the whole population of each city investigated 32
number and per cent of persons of each, for the whole population of each city investigated 28

Page

Sex—Concluded.
number and per cent of persons under classified weekly earnings by 65
occupations by, with selected places of birth (Table XVI) 51–55, 164–211
persons illiterate as regards English, but literate as regards some other language by, with age periods and selected places of birth (Table XXIII) 70, 71, 530–533
persons sick or physically defective by, with nativity and kind of ailment or defect (Table XXVIII) 84, 566–573
persons unemployed by, with age periods and months unemployed (Table XIX) .. 65, 66, 502–505
school attendance by, with nativity, kind of school, and age (Table XXV) 75, 76, 536–539
selected places of birth by, with age periods (Table II) 37–42, 114–117
weekly earnings and days and hours of labor by, with occupation (Table XVII) .. 55–64, 212–459
Sex and nativity—
number and per cent of persons of each conjugal condition by 33
number and per cent of persons of each conjugal condition by, for the whole population of each city investigated 34
number and per cent of persons under specified age periods by 35
number and per cent of persons under specified age periods by, for the whole population of each city investigated 36, 37
relationship to head of family by (Table V) 45, 46, 121–125
Sick or physically defective persons, by kind of ailment or defect, nativity, and sex (Table XXVIII) 84, 566–573
Sleeping rooms, occupants of, and cubic feet of air space per individual, by number of outside windows and occupants to a room (Table XXXIII) 101, 102, 602–613
Slum districts canvassed, boundaries of in—
Baltimore 23
Chicago 23
New York 23, 24
Philadelphia 24
